

January 21, 2022

The Honorable Kathy Byron, Chair
The Honorable Terry Kilgore, Vice Chair
House Commerce and Energy Committee
900 E Main St
Richmond, VA 23219

Dear Chair Byron, Vice Chair Kilgore, and Members of the House Commerce and Energy Committee,

The Virginia Association of Hematologists and Oncologists (VAHO) and the Association for Clinical Oncology (ASCO) are pleased to support HB 480, which would provide coverage of fertility preservation for patients with cancer.

ASCO is a national organization representing physicians who care for people with cancer. With nearly 45,000 members, our core mission is to ensure that cancer patients have meaningful access to high quality cancer care. VAHO is a professional organization whose mission is to help foster the highest quality of cancer care in the state of Virginia. VAHO members are a community of oncologists, nurse practitioners, physician assistants and other allied health professionals deeply involved in care of our cancer patients.

VAHO and ASCO believe that as part of education and informed consent before cancer therapy, health care providers should address the possibility of infertility with both male and female patients treated during their reproductive years. Providers should also be prepared to discuss fertility preservation options and/or refer all potential patients to appropriate reproductive specialists. As such, VAHO and ASCO advocate for coverage of embryo, oocyte and sperm cryopreservation procedures for an insured patient who is at least eighteen years of age and has been diagnosed with cancer but has not started cancer treatment (including chemotherapy, biotherapy or radiation therapy treatment) in accordance with [guidelines](#) developed by our affiliate organization, the American Society of Clinical Oncology.

We encourage providers to advise patients regarding potential threats to fertility as early as possible in the treatment process to allow for the widest array of options for fertility preservation. VAHO and ASCO strongly support HB 480 and encourage the Virginia General Assembly to pass this legislation to protect fertility preservation procedures for cancer patients. If you have questions or would like assistance on any issue involving the care of individuals with cancer, please contact Aaron Segel at ASCO at aaron.segel@asco.org.

Sincerely,
