

HB 2027 & HB2028

Good Afternoon Mr. Chairman and Committee Members,

My name is Yolanda Bell, and I am a constituent of Delegate Roem.

I have been here before you every year since my sister, Anastasia Adams, was killed; speaking in favor of Bills that will stop institutions and guardians from doing what was done to her again. I don't know what else I can say to you or show you to impress upon you the importance and urgent need for these bills and meaningful guardianship reform with teeth. So I leave you with the facts and plead with you once again to pass these bills unanimously.

Fact No. 1. Anastasia was placed into a hospital guardianship solely because I, as her power of attorney, refused to consent to her discharge because I believed she was still too ill. A fact that the Office of Medicare Hearing and Appeals (OMHA) confirmed in their ALJ's written decision. Per 42 CFR § 478.38¹, the fact that Anastasia's discharge had been appealed to Medicare in Washington, D.C. nullified Kepro's decision siding with the hospital. But by that time Fairfax had already given her over to Inova and their guardians and they had already taken and removed her and refused to give her back. Bottom line Inova should not have been able to file for and receive guardianship until Medicare rendered their decision.

Her guardian's that have contacted you have lied to you. I leave you with the official court transcript for the guardianship hearing and the Medicare decision. I know you don't have the time to read them now because of other bills you must hear, but I respectfully request you do read them to have a full understanding of the true account of what was done.

Fact No. 2. It was impossible to get back in front of Judge Shannon to have him look at what was happening to Anastasia. Judges must have better oversight of their guardianship cases. Better oversight would have prevented my sisters' suffering and her death.

¹ 42 CFR § 478.38 *Effect of a reconsidered determination - A QIO reconsidered determination is binding upon all parties to the reconsideration **unless** - (a) A hearing is requested in accordance with § 478.40 and a final decision rendered.*

Fact No. 3. Anastasia was neglected and abused. The guardians did not regularly visit and check on her. When notified of injuries they essentially ignored them. Anastasia weighed over 120lbs when the guardians took her. She weighed a mere 87lbs when she died nine months later.

Fact No. 4. The guardians, in their own words, stopped feeding and hydrating Anastasia solely "so she [would] die faster."

Fact No. 5. Anastasia had broken bones and too many bruises to count when she died and her body showed signs of abuse, a struggle, and it is believed sexual assault.

Fact No. 6. Anastasia's right hip/femur and ankle were broken and never fixed causing her excruciating pain and leaving her deformed. The guardians canceled her private medical coverage which was paid for by me.

Fact No. 7. All visitors were banned from seeing Anastasia until I took the guardians to federal court.

Fact No. 8. Visitation was severely restricted by the guardians. This combined with no regular in person visits by the guardians left her vulnerable to abuse and neglect. The eyes of family and friends could have prevented it from happening.

Fact No. 9. Clergy were turned away.

Fact No. 10. Anastasia suffered horribly because there are no laws to prevent any of these things from happening.

Fact No. 11. I told Inova in the January 26, 2017, meeting I would remove Anastasia from the hospital and they took her anyway.

Fact No. 12. Because of the severe visitation restrictions, Anastasia died alone without family, friends, or clergy there to hold her hand.

Thank you for your time and attention.

Respectfully,
YolandaBell
Anastasia's Voice

In The Matter Of:
INOVA, d/b/a INOVA FAIRFAX HOSPITAL v.
ANASTASIA V. ADAMS

HEARING

1 T H E P R O C E E D I N G S :

2 (The court reporter was first duly sworn by the
3 clerk of the Court.)

4 THE COURT: Good morning.

5 MS. KIRKLAND: Good morning.

6 MS. MORISI: Good morning.

7 THE COURT: Would the attorneys please
8 introduce themselves and their respective parties.

9 MS. KIRKLAND: Good morning, Your Honor.
10 Laurie Kirkland on behalf of the petitioner, INOVA, doing
11 business as INOVA Fairfax Hospital.

12 THE COURT: All right.

13 MS. MORISI: Good morning, Your Honor. My name
14 is Andrea Morisi, and I represent Yolanda Bell. She is
15 the sister of the respondent, Anastasia Adams.

16 THE COURT: Okay. Is there a third party?

17 MS. JOHNSTON: Good morning, Saben Johnston,
18 guardian ad litem.

19 THE COURT: Okay, good morning.

20 Do we have another party involved in this?

21 MS. KIRKLAND: That's all, Your Honor.

22 THE COURT: Okay.

1 MS. KIRKLAND: The respondent, Ms. Adams, has a
2 guardian ad litem, but she's at the hospital. She won't
3 be present.

4 THE COURT: Okay, so ma'am, you're the guardian
5 ad litem for --

6 MS. JOHNSTON: For Ms. Adams, yes.

7 THE COURT: Okay.

8 MS. JOHNSTON: Where would you like me to sit?

9 THE COURT: You can sit wherever you are
10 comfortable. This isn't my usual courtroom, so it's --
11 wherever you are comfortable, but you have a right to
12 examine folks as well, so if you want to move up, that's
13 fine.

14 MS. JOHNSTON: Okay.

15 THE COURT: All right. I've let the parties
16 talk for a while. What's the status of this case right
17 now?

18 MS. KIRKLAND: Your Honor, on behalf of INOVA,
19 we're prepared to go forward. This comes on our petition
20 to appoint guardians and conservators for Ms. Adams.

21 We have tried to work something out with her
22 sister, Ms. Bell, but right now we have not reached a

1 settlement.

2 THE COURT: All right. Is there anything we
3 need to take up preliminarily before we start with
4 opening statements?

5 MS. KIRKLAND: I don't have anything.

6 MS. MORISI: No, Your Honor.

7 THE COURT: All right, then let's proceed.
8 Opening for INOVA.

9 MS. JOHNSTON: Thank you, Your Honor.

10 Again my name is Laurie Kirkland. I represent
11 INOVA Fairfax Hospital, and this comes on our petition to
12 appoint guardians and conservators for a patient at
13 INOVA. Her name is Anastasia Adams, the respondent.

14 As a professional matter, I don't expect
15 evidence to be undisputed that Ms. Adams lacks capacity.
16 She suffered anoxic brain injury due to a Tylenol
17 overdose in 2005. And currently she is not communicative
18 and in bedridden state.

19 So the issue before the Court really will be
20 who is the suitable decision maker for her, given that
21 she lacks capacity. INOVA is petitioning for mutual
22 professional guardians and conservers to be appointed,

1 and we have proposed Ken Labowitz and Anne Heishman, who
2 are two attorneys practicing before the Bar of this
3 Court. Ms. Yolanda Bell is the sister and she has got a
4 cross-petition to be the guardian.

5 By way of background, as I mentioned, Ms. Adams
6 -- she's a 59-year-old woman. She suffered a brain
7 injury due to the lack of oxygen in 2005. Since 2005
8 INOVA does understand that Ms. Bell has been her primary
9 caregiver. She also claims to have a power of attorney
10 that's dated 2010, so five years after the brain injury
11 had occurred.

12 But nonetheless whether she's next of kin
13 making decisions, or making them -- to a power of
14 attorney, INOVA feels it's no longer in Ms. Adams' best
15 interest.

16 In December of last year Ms. Adams was
17 receiving treatment for pneumonia at INOVA Loudoun
18 Hospital. On December 2, 2016, the evidence will show
19 that Ms. Bell had her sister transferred to INOVA Fairfax
20 Hospital against medical advice. She was advised that
21 due to on-going pneumonia, the fever, respiratory
22 failure, there was no medical reason to transfer her

1 after there was a risk. Nonetheless, she was transferred
2 against medical advice.

3 Upon arrival at Fairfax, she was treated for
4 pneumonia by anti-biotics, it was clear. She did develop
5 some fluid around her heart, but within a few weeks that
6 also had been conservatively managed. It was not a
7 problem.

8 As of December 28, 2016, Ms. Adams was cleared
9 by every division at Fairfax Hospital for discharge. The
10 evidence will show that since that time, for 50 days, Ms.
11 Bell, next of kin or power of attorney, has refused to
12 remove the status from the hospital.

13 Ms. Adams no longer requires acute care and
14 because she doesn't require acute care, Medicare has
15 denied her coverage, and her only other cover is Kaiser
16 Insurance, and this is out of plan. Ms. Bell signs forms
17 as Ms. Adams power of attorney authorizing those expenses
18 for which Ms. Adams becomes liable.

19 The Court will hear from Dr. Betzlos. He is
20 the chief medical officer at Fairfax Hospital. He will
21 testify that for the past 50 days Ms. Adams has been
22 stable and ready for discharge.

1 He will testify he's communicated with Ms. Bell
2 on multiple occasions, including many in-person meetings,
3 and spoke to her to address each and every medical
4 concern she has raised about her sister, Ms. Adams. The
5 issues which -- these are issues Ms. Bell raises that she
6 alone believes prevent discharge.

7 After 50 days of trying to address Ms. Bell's
8 medical concerns which are ever changing, and are left
9 with no other option but to proceed the petition to
10 appoint a more suitable guardian and conservator for Ms.
11 Adams who cannot make these decisions for herself.

12 Based on the evidence, INOVA requests the Court
13 appoint Ken Labowitz and Anne Heishman, who currently
14 serve as guardians and conservators for many persons
15 under the direction and under this Court, and in this
16 Court as well that a jurisdiction is in order to reach a
17 -- (unintelligible).

18 THE COURT: Okay.

19 MS. KIRKLAND: Finally, I would note that the
20 GAL, Ms. Saben Johnston, has also filed with the Court
21 and reaches the same conclusion. As you will see from
22 her report from her today, she concludes that Ms. Bell

1 clearly loves and cares for her sister very much, but
2 right now has been unable to make the decision necessary
3 to discharge her from the hospital and find a suitable
4 place for her to receive the appropriate level of care.

5 For these reasons we will ask that the Court
6 grant the petition to appoint neutral guardians and
7 conservators for Ms. Adams.

8 THE COURT: Okay, counsel, what is the legal
9 standard?

10 MS. KIRKLAND: Your Honor, the petition is
11 filed under Virginia Code 64-2000, there's a Code
12 chapter; 2007 will give you the seven factors that you
13 would consider today.

14 THE COURT: Is that 64.2 or 64 --

15 MS. KIRKLAND: 64.2-2007.

16 THE COURT: Okay.

17 MS. KIRKLAND: And there's seven factors the
18 Court can consider. The one notation for the respondent,
19 the development of the respondent, the availability of
20 less restrictive alternatives, the extent is necessary to
21 protect the respondent from neglect and abuse. The
22 actions needed to be taken by a guardian and a

1 conservator, the suitability of the proposed guardians
2 and conservators and the best interests of the
3 respondent.

4 THE COURT: I see, okay. Thank you very much.

5 MS. KIRKLAND: Thank you, Your Honor.

6 THE COURT: All right, counsel, opening
7 statement.

8 MS. MORISI: Thank you, Your Honor.

9 There's no disagreement that Ms. Anastasia
10 Adams is a person with profound disabilities. And due to
11 those disabilities it's easy for an imbalance in any one
12 of her systems, via cardiac, pulmonary, vascular,
13 digestive; anything that goes out of balance can cause a
14 critical medical issue with this woman. And when a
15 specialist works on addressing one area, they often put
16 another area into an imbalance. And there's a likelihood
17 that this becomes a repeating cycle.

18 Ms. Yolanda Bell disagreed with INOVA Fairfax
19 Hospital that her sister has been stable for discharge
20 back in late December or early January of this year
21 because it was a hasty discharge from Reston INOVA
22 Hospital to a Potomac Falls nursing home that was

1 unprepared and unsafe that resulted in the need for her
2 to be readmitted to INOVA Fairfax.

3 At the time that INOVA Fairfax has been talking
4 about discharge, there's been on-going medical issues
5 with her heart, her lungs, a looming blood clot, and
6 these have given Ms. Bell concern that again she's going
7 to have this revolving door of medical needs as one thing
8 gets addressed or doesn't get addressed, and other things
9 arise due to the imbalances in her systems.

10 Ms. Bell's response to her sister's medical
11 issues is identical to those of a parent or a child. She
12 desires and reaches out for information. What is going
13 on with my sister? What is the course of treatment?
14 What's recommended, not recommended? Is this my sister's
15 new normal? Please help me to understand that. What
16 does this mean?

17 So ironically INOVA Fairfax Hospital so
18 interested in having Ms. Adams discharged, actually
19 ordered all information, except access to medical records
20 be denied Ms. Bell. So for nearly a month she was not
21 allowed to talk to doctors to get the information that
22 they wanted her to have to make a decision on discharge.

1 Ms. Bell has been her sister's caregiver, power
2 of attorney, the reminder of her medical history, her
3 staunchest advocate for nearly 12 years, and she should
4 be her guardian if a Court determines one is required.
5 Ms. Bell feels Ms. Adams' medical condition has improved,
6 and that discharge to a safe and appropriate facility or
7 to her home is appropriate provided the care and other
8 concerns needed to get her there are addressed.

9 THE COURT: All right.

10 MS. MORISI: She needs continuing medical care
11 in whatever facility she goes to or home, and we're
12 concerned about those being put in place.

13 THE COURT: But your client, as I understand
14 it, does not want her to go back to her home right now,
15 she wants her to stay in the hospital, correct?

16 MS. MORISI: If discharge can be arranged to a
17 safe and appropriate place with the assistance she needs,
18 she's ready to do that.

19 THE COURT: Okay, thank you.

20 Would the GAL like an opening statement?

21 MS. JOHNSTON: No, Your Honor, I filed a report
22 yesterday, and they told me you received it?

1 THE COURT: Yes.

2 MS. JOHNSTON: Okay, then I'll reserve my
3 statement for argument?

4 THE COURT: All right, thank you.

5 All right, INOVA's first witness.

6 MS. KIRKLAND: We call Dr. Scott Betzlos.

7 (The witness was first duly sworn by the clerk of
8 the Court.)

9 Whereupon,

10 SCOTT BETZELOS, M.D.,

11 a witness, called for examination by counsel for the
12 petitioner, and having been first duly sworn by the clerk
13 of the Court, was examined and testified as follows:

14 DIRECT EXAMINATION

15 BY MS. KIRKLAND:

16 Q. Good morning. Would you state your name for
17 the record?

18 A. Dr. Scott Betzelos.

19 Q. And what is your current occupation and job
20 title?

21 A. Chief Medical Officer of INOVA Fairfax
22 Hospital.

1 Q. And can you briefly describe your educational
2 background?

3 A. Sure. I went to Loyola University for college,
4 and then onto Chicago Medical School to receive my
5 medical degree, and then to Orlando Regional Medical
6 Center where I did my residency in emergency medicine. I
7 also have a master's degree from Touro College in New
8 York in forensic examination, and an MBA recipients.

9 Q. And do you hold any Board Certifications?

10 A. I am Board Certified in emergency medicine.

11 Q. And do you hold a medical license in the
12 Commonwealth of Virginia?

13 A. Yes.

14 Q. And how many years of experience do you have as
15 a physician?

16 A. From 1989.

17 Q. Do you have any honors or --

18 A. Just Board Certified of the American College of
19 Emergency Physicians.

20 MS. KIRKLAND: If I could show this exhibit.
21 They're not marked, but Exhibit A.

22 THE COURT: Why don't we have the document

1 marked just so we could keep track of everything.

2 MS. KIRKLAND: That's great.

3 (The document referred to above was marked
4 Petitioner's Exhibit A for
5 identification.)

6 BY MS. KIRKLAND:

7 Q. Dr. Betzelos, is the document we just marked as
8 Exhibit A a copy your CV?

9 A. Yes, it is.

10 Q. And does it accurately reflect your relevant
11 education and experience?

12 A. Yes.

13 MS. KIRKLAND: Your Honor, I move Dr. Betzelos'
14 CV into evidence.

15 THE COURT: Any objection?

16 MS. MORISI: No, Your Honor.

17 THE COURT: The Court will receive a section of
18 Exhibit. Will that be A or 1, Madam Clerk?

19 THE CLERK: I marked it as A, Your Honor,
20 that's fine.

21 THE COURT: All right.

22 MS. KIRKLAND: Thank you.

1 (The document referred to above was marked
2 Petitioner's Exhibit A for identification
3 and was received into evidence.)

4 MS. KIRKLAND: Your Honor, I'd also like to
5 offer Dr. Betzelos as an expert in the field of medicine.

6 THE COURT: All right, any objection?

7 MS. MORISI: No, Your Honor.

8 THE COURT: All right, the Court will recognize
9 the doctor as an expert.

10 MS. KIRKLAND: Thank you.

11 BY MS. KIRKLAND:

12 Q. Dr. Betzelos, are you familiar with a patient,
13 Anastasia Adams?

14 A. Yes, I am.

15 Q. Can you describe her overall physical and
16 medical condition?

17 A. Anastasia suffers from anoxic brain
18 encephalopathy. She's unable to communicate and she's
19 contracted -- her lower extremities are contracted up.
20 She receives her nutrition through a G-Tube, and from a
21 cardiovascular standpoint she is at a stable condition,
22 and from a pulmonary standpoint she is in stable

1 condition.

2 Q. And based on her condition, does she have the
3 mental ability to make or communicate important decisions
4 about her health or well-being?

5 A. Absolutely not.

6 Q. And does she have the mental ability to make or
7 communicate important decisions regarding her finances or
8 her property?

9 A. No.

10 Q. Does she have the sufficient understanding
11 nature of this proceeding regarding guardian or
12 conservatorship?

13 A. No.

14 Q. And do you hold those opinions to a reasonable
15 degree of medical certainty?

16 A. Yes.

17 Q. When was Ms. Adams most recent admission to
18 INOVA Fairfax Hospital?

19 A. At around the first week of December. I
20 believe it was the 2nd.

21 Q. And do you know the reason for her admission?

22 A. She was a transfer from -- I want to say it was

1 a transfer from our sister hospital INOVA Fair Oaks --
2 I'm sorry, INOVA Loudoun where she was admitted for
3 pneumonia, and was transferred to our facility against
4 medical advice at the transferring facility, and was
5 received at our facility.

6 Q. And why was the transfer against medical
7 advice?

8 A. The transfer was against medical advice because
9 anytime you transfer a patient that has an acute
10 condition, you put them at a greater risk during that
11 transfer rather than maintain them at the current
12 facility that they're at. So if the benefit doesn't
13 outweigh the risk, we generally do not want to transfer
14 patients.

15 Q. And was she transferred against medical advice?

16 A. Yes. According to the records she was
17 transferred against medical advice because she wanted --
18 she said that she -- the priest at Fairfax Hospital and
19 that's where she wanted to be.

20 THE COURT: Who is she, sir?

21 THE WITNESS: I'm sorry, Ms. Bell.

22 BY MS. KIRKLAND:

1 Q. Ms. Bell stated the reason for transfer was so
2 that Ms. Adams would be near her priest?

3 A. Yes.

4 Q. And in your experience and in your visits and
5 your familiarity with Fairfax, have you seen a priest
6 meet with Ms. Adams?

7 A. Not to me extent, no.

8 Q. After admission to INOVA Fairfax, did INOVA
9 successfully treat Ms. Adams' pneumonia?

10 A. Yes, we did successfully treat the pneumonia.

11 Q. And how was she treated?

12 A. She was treated with IV anti-biotics followed
13 by oral anti-biotics. She also had developed a small
14 amount of fluid around the heart, around the pericardial
15 effusion. That's the sack that surrounds the heart, and
16 that fluid was due to the inflammation that you get from
17 pneumonia, and that fluid subsequently has resolved, and
18 so now we treated the pneumonia. We also treated the
19 secondary facts of pneumonia with specific pericardial
20 effusion.

21 Q. And around what time was the pneumonia and the
22 pericardial effusion treated?

1 A. Through the timeframe of two weeks of December.

2 Q. And did there come a time when Ms. Adams was
3 stable and ready for discharge?

4 A. Yes.

5 Q. Approximately when was that?

6 A. That was on or around December 28th. The
7 medical team which included cardiac specialists,
8 pulmonologists, infectious disease, hematology all
9 concluded that Anastasia was stable for discharge to an
10 appropriate level of care; specifically a SNF unit.

11 THE COURT: To where, sir?

12 THE WITNESS: To a skilled nursing facility, a
13 nursing home.

14 BY MS. KIRKLAND:

15 Q. And why hasn't Ms. Adams not left INOVA Fairfax
16 Hospital to be transferred to one of those homes.

17 A. Ms. Adams is not approving discharge for
18 Anastasia --

19 Q. You mean Ms. Bell?

20 A. I'm sorry, Ms. Bell has not approved discharge
21 of Anastasia to an appropriate level of care claiming
22 that we have not answered her questions regarding the

1 care that we provided.

2 Q. And have you met personally with Ms. Bell?

3 A. Yes, I have.

4 Q. How many times would you estimate that you had
5 spoken to her?

6 A. I think Ms. Bell and I spoke at least two
7 times, or maybe three, I can't remember.

8 Q. And were those in-person meetings?

9 A. They were in-person meetings, yes.

10 Q. And in addition, you have other positions than
11 in-communications with her?

12 A. Every day.

13 Q. Are you aware of any physician that has been
14 ordered not to speak to Ms. Bell?

15 A. No, no. What that is about, we asked Ms. Bell
16 to only communicate with our physicians during regular
17 business hours. She has a habit of paging physicians in
18 the late hours of the night, past 11:00 in the evening
19 and disturbing the physicians.

20 Q. Can you describe generally your experience in
21 dealing with Ms. Bell in order to obtain her
22 authorization for discharge?

1 A. Say that again?

2 Q. Sure. Can you describe your experience in
3 dealing with Ms. Bell in trying to address her concerns
4 or obtain her authorization to discharge Ms. Adams?

5 A. Ms. Bell no doubt loves her sister and cares
6 for her deeply. She has many, many medical questions.
7 Some of it are relevant, some of it are not. We as a
8 medical team have attempted to answer every single one of
9 her questions; however, we never are able to answer her
10 questions to the answer that she wants to hear.

11 So when we say that the pericardial effusion,
12 the fluid around the heart, will go away, Ms. Bell will
13 ask for another echocardiogram or ask for another consult
14 or ask for a different opinion, and this gets into what
15 we call circular conversation around what is already
16 deemed by the care team as a stable pericardial effusion
17 that will resolve on its own. That's just one example.

18 And she gets into the medical record and asks
19 questions and says well, there's a millimeter difference
20 here, a millimeter difference there, and we tell her that
21 that doesn't -- that's just a normal thing, you don't
22 have to worry about that kind of thing, and that doesn't

1 satisfy her; so she says we don't answer her questions
2 when we actually do and say that's not a medical concern.

3 Q. And in addition to medical concerns, has she
4 raised any issues relating to nutrition or food?

5 A. Yes. She has brought in G-tube feedings that
6 were backing up into Anastasia's room that the nurses had
7 put in there and they keep putting them in there instead
8 of using them -- they used them, and then bring extras in
9 just to have on the side.

10 Q. Just for the Court's background, can you
11 explain what the concerns Ms. Bell brought to you was?

12 A. She was concerned that we were not feeding
13 Anastasia, that we were just putting the bags of food
14 that go into the G-tube in the room, and the nurses were
15 not feeding Anastasia. And the nurses were, they were
16 just bringing in extra in the room to have to be more
17 efficient.

18 Q. And to your knowledge has Ms. Adams received
19 the proper food package recommended by a nutritionist?

20 A. Yes.

21 Q. Was another issue that she raised or a request
22 for percussion therapy for Ms. Adams?

1 A. Oh, yes, that is true. But can I get back to
2 the G-tube?

3 Q. Sure, absolutely.

4 A. Also during our conversation Ms. Bell brought
5 in an expired product of G-Tube feedings, and I was very
6 concerned about that because we actually don't want to
7 give expired food to patients. And I had the lot number
8 reviewed by our supply chain, and that lot number was never
9 purchased by INOVA Fairfax health system.

10 Q. So to your knowledge based on your personal
11 research, INOVA was not giving expired food to Ms. Adams?

12 A. Right, that lot number was never purchased by
13 INOVA Fairfax health system.

14 Q. We were just moving to the issue of percussion
15 therapy. Is that another concern that Ms. Bell had
16 raised?

17 A. Yes, it is.

18 Q. And what is percussion therapy?

19 A. Percussion therapy is bed-ridden patients --
20 you can many times see physicians take their hand and
21 pump on the patient's chest and back. And what that does
22 is it loosens up mucus phlegm within the chest.

1 Q. Is percussion therapy a treatment currently
2 ordered by any of Ms. Adams' attending physicians?

3 A. It's not ordered, but the respiratory
4 therapists are doing that.

5 Q. And do you know why they are doing that?

6 A. At the request of Ms. Bell.

7 Q. Are you aware of any standard of care that
8 requires that therapy?

9 A. I'm not aware of any standard of care that
10 requires chest percussion therapy.

11 Q. And to a reasonable degree of medical certainty
12 what is your opinion as to why she requires that therapy
13 at this time?

14 A. It's added to therapy, not required.

15 Q. How has Ms. Bell's insistence that her sister
16 receive that therapy hinder INOVA efforts in finding an
17 appropriate facility to which she could be discharged?

18 A. You know, we have several skilled nursing
19 facilities in the area we can speak with case management,
20 but I think it's greater than 15, and all of them do not
21 do chest percussion therapy.

22 Q. And so as her insistence on percussion therapy

1 preventing discharge?

2 A. It's one of the reasons that it's preventing us
3 from discharging.

4 MS. KIRKLAND: I think then, Your Honor, I
5 marked this as Exhibit B.

6 THE COURT: Yes.

7 (Whereupon, a document was presented to the Court
8 and the witness.)

9 (The document referred to above was marked
10 Petitioner's Exhibit B for
11 identification.)

12 BY MS. KIRKLAND:

13 Q. Dr. Betzelos, having you look at Exhibit B,
14 which are Ms. Adams' medical records from yesterday. Do
15 these records in Exhibit B accurately reflect her current
16 medical condition?

17 A. Yes, they do.

18 Q. I would like to direct your attention to the
19 section titled, Plan, on the first page. As of yesterday
20 which division at INOVA Fairfax Hospital cleared Ms.
21 Adams for discharge?

22 A. It says here that patient is cleared for

1 discharge by hematology, infectious disease, cardiology,
2 pulmonary, nephrology and internal medicine.

3 Q. And are you aware of anything that's changed
4 between yesterday and this morning?

5 A. No, I'm not aware of anything that changes
6 that.

7 Q. And are you aware of any medical provider who
8 has seen and treated Ms. Adams and does not believe she
9 has been ready for discharge since December?

10 A. No, I am not.

11 Q. And how long has she been stable for discharge?

12 A. About --

13 THE COURT: About how long?

14 THE WITNESS: About a month and a half. Since
15 December 28.

16 BY MS. KIRKLAND:

17 Q. Okay, so about 50 days?

18 A. Yes.

19 Q. Since the --

20 A. And there was a small episode where she spiked
21 a fever and was given anti-biotics again, but that could
22 have been done in a nursing home as well.

1 Q. So in the past 50 days nothing has occurred
2 that could not have been treated suitably in a skilled
3 nursing facility?

4 A. Correct.

5 Q. Since the date of her discharge in December,
6 2016, has Medicare been covering her stay?

7 A. Medicare has not covered her stay since she was
8 cleared for discharge on December 28. Ms. Bell has
9 appealed twice to the QAPI, the Quality Assurance Program
10 for Center Medicare and Medicaid Services, CMS, and they
11 have denied her appeal twice indicating that Anastasia is
12 stable for discharge.

13 Q. And during this time in the past 50 days, what
14 percent of beds at INOVA Fairfax Hospital have been full?

15 A. We're in a busy season. We're at 95-plus
16 capacity every single day.

17 Q. And why is that important?

18 A. INOVA Fairfax Hospital is a level-one trauma
19 center. The only one in northern Virginia, and we have
20 obligations to serve our community, and we have patients
21 through our emergency department and care for patients as
22 they are admitted. We have patients that are occupying a

1 bed that are not suppose to occupy a bed and are
2 appropriate for an alternative level of care. It's
3 compromising our ability to treat patients that are
4 presented with acute conditions.

5 Q. Dr. Betzelos, are you aware that this
6 proceeding is to appoint neutral professional guardians
7 and conservators for Ms. Adams?

8 A. Yes.

9 Q. And you support that petition?

10 A. Yes, I do.

11 Q. And why do you support it?

12 A. We believe that -- the care team believes that
13 and INOVA Fairfax Hospital believes that Anastasia Adams
14 is stable for discharge and Ms. Bell is preventing that
15 discharge and compromising the care of Anastasia with
16 that blocking us from being able to transfer Anastasia to
17 an appropriate level of care.

18 Q. And in your medical opinion, what is the
19 appropriate treatment for Ms. Adams at this time?

20 A. At this time is transfer to a lower level of
21 care, to a SNF facility.

22 Q. And in your opinion that a neutral professional

1 guardian would be able to facilitate that placement?

2 A. Yes, it is.

3 Q. And why do you believe that?

4 A. Because I have had multiple conversations -- I
5 believe Ms. Bell and I met for an hour, along with her
6 attorney, and a number of people to try to resolve this
7 at the hospital. That did not work. I don't believe
8 that Ms. Bell will allow us to discharge Anastasia
9 regardless of the medical condition that she is in.

10 Q. And at this time do you believe there is any
11 less restrictive alternative that would be in Ms. Adams'
12 interests?

13 A. No.

14 MS. KIRKLAND: I have no further questions.

15 THE COURT: Cross-examination.

16 MS. MORISI: Thank you, Your Honor.

17 CROSS-EXAMINATION

18 BY MS. MORISI:

19 Q. Doctor, you spoke about the percussion therapy.
20 This is very important, as you know, to Ms. Adams. Is
21 there any risk -- well, what are the risks from
22 percussive therapy?

1 A. There are no risks to perform percussion
2 therapy.

3 Q. Okay. Are there benefits?

4 A. There are benefits, as I indicated earlier,
5 that it can help reduce mucus phlegm.

6 Q. In a person who's bed ridden or has
7 constrictors such as Ms. Adams?

8 A. Yes, but it's added to therapy, it's not a
9 standard of care.

10 Q. All right.

11 (Whereupon, a document was presented to the Court
12 and counsel.)

13 THE COURT: Counsel, how would you like this
14 document marked? Since we're going with the alphabet why
15 don't we just say Respondent's A? Does that work good?

16 MS. MORISI: Intervener A?

17 THE COURT: Oh, Intervener A, okay. Madam
18 Clerk, what's easier for you?

19 (Discussion off the record not reported by the court
20 reporter.)

21 (The document referred to above was marked
22 Intervener's Exhibit A for

1 identification.)

2 BY MS. MORISI:

3 Q. Doctor, do you recognize this as an extra
4 report summary from the record to Anastasia Adams at
5 INOVA Hospital?

6 A. Yes, I do.

7 Q. And in the center there where the large circle
8 is, which -- not that it didn't come on the report that
9 way, but those large spikes, could you tell us what that
10 indicates?

11 A. Well, the top graph is the vital signs, and it
12 looks to be -- I think you got heart rate here and pulse
13 oximetry, and at one point the heart rate spiked to 200,
14 and then dropped to zero, and this is an initial spike,
15 and most likely related to some type of movement in the
16 string of vital signs. It's not uncommon to see
17 something like this.

18 Q. And does it stream as that from the upper range
19 to the lower range, and that appears to be over a 10-hour
20 period on January 9th?

21 A. Right. From what I'm guessing, you printed a
22 very condensed piece here, and I think at sometime

1 between 7-ish, but that's if it was bigger. A lot of
2 things are -- so I could see exactly what it was and it
3 wasn't just an initial spike. It could be that there was
4 an episode of tachycardia, a very fast heart rate which
5 can happen, but I really can't tell you which it is
6 unless you expand this out. But I do know that Anastasia
7 did have an episode of tachycardia at some point in
8 January, so if that's what this is, that's what it is.

9 Q. I think that might be one example of it; didn't
10 find them all in the strings, those tapes. And I
11 apologize that it appears even though my printer says it
12 has all the ink levels, I know the colors are not right
13 because INOVA is not red, it should be blue.

14 But below you said the other, the lower graph
15 was on -- is that oxygen saturation?

16 A. No, I think that the oxygen saturation is built
17 in --

18 Q. Oh, I'm sorry.

19 A. -- top graph.

20 Q. It's in the top graph.

21 A. And that's an interesting thing that you bring
22 up is because the oxygen saturation was absolutely normal

1 when the heart rate is supposedly zero, and that can't
2 happen, so that tells me that's an artifact.

3 Q. Okay. But it did dip below right after that,
4 didn't it?

5 A. Yeah, but it wouldn't take that long. If your
6 heart rate went to zero, your oxygenation goes to zero in
7 two minutes. After the fact it goes way low before that,
8 and, you know, I don't see any change in the oxygen
9 saturation, and the high spike before it went up, which
10 means it could have been a stable tachycardia. And the
11 bottom graph --

12 Q. Do you think this is the monitor alarms?

13 A. These are the alarms, yeah.

14 Q. On the equipment that's in her room?

15 A. Yes, and that's not uncommon either. These
16 alarms go off all the time. They actually cause alarm
17 fatigue to our providers.

18 Q. This past weekend Ms. Adams suffered from a low
19 oxygen saturation?

20 A. Yes, that is true.

21 Q. And what would be the causes from low oxygen
22 saturation?

1 A. Right. Patients that have hypoxia or low
2 oxygen events that are bed ridden more than likely suffer
3 from either a recurrent infection or a blood clot in the
4 lung called pulmonary embolism.

5 The physicians immediately identified this and
6 ordered a CT angiogram, that's a CT scan of the heart and
7 lungs where we inject dye and look for blood clots. And
8 that exam revealed that there were no blood clots and no
9 further pneumonia.

10 Q. And during the times that Ms. Adams suffers
11 from low oxygen saturation, what would it be like for
12 someone who -- is that like us having a chest cold where
13 we are not getting full oxygen in our lungs. What would
14 you say how the symptoms would be?

15 A. You know, people like us that have normal
16 physiology that suffer from that, we would have the same
17 physiology barrier to prevent us from breathing. But
18 people that are bed ridden, their swallow reflex doesn't
19 work as well as us, and therefore they may swallow saliva
20 instead of going down the swelling tube, the esophagus,
21 it goes down the trachea and cause a temporary plugging
22 of one the alveoli in the lung, and that would cause an

1 hypoxia event. Does that make sense?

2 Q. Yes, I understand. Thank you for the
3 physiology discussion. I meant what would she be looking
4 like, would she be in distress, would she be coughing,
5 choking, something like that?

6 A. It all depends upon the neurological status of
7 the patient; you and I, yes. Anastasia, I'm not quite
8 sure based on her neurological status, but my guess is
9 that she would have some type of display of a very, very
10 -- a neurological display of pain.

11 Q. And what is the treatment for low oxygen
12 saturation, that's what you call it?

13 A. Well, the initial treatment is oxygen, and then
14 the diagnostics will detail out to what the further
15 treatment is. And in this case the CT Scan does not
16 reveal any abnormality that requires to do any additional
17 treatment.

18 Q. Would an incident such as she had this past
19 weekend lead to an order for her to have oxygen on an as-
20 needed basis or on a regular basis?

21 A. Oxygen therapy is not always the best thing.
22 You want to use it judiciously and when it's appropriate,

1 so if you're oxygenating well, there is really no need to
2 provide oxygen on an on-going basis, and can actually
3 hurt. So what we want to do is order oxygen during
4 events or preceding events that we believe are going to
5 cause low oxygen.

6 MS. MORISI: Thank you. I have no further
7 questions.

8 THE COURT: All right. Cross-examination with
9 GAL.

10 CROSS-EXAMINATION

11 BY MS. JOHNSTON:

12 Q. Ms. Bell had a few other concerns that she had
13 addressed. One of those was related to the weight of her
14 sister. How did INOVA address that, those questions?

15 A. Well, we've been following her weight, and it's
16 our opinion that she's back to her baseline weight, and
17 we are continuing to feed her through her G-Tube diet
18 with the appropriate hydration.

19 Q. And also at the meeting there was concerns
20 regarding a blood clot by her sister. How did INOVA
21 address that?

22 A. We addressed that through ultra-sounds of her

1 right upper arm extremity, and the ultra-sound shows that
2 the blood clot is resolving and blood flow has returned,
3 and the hematologist has ordered a low dose of Lovenox,
4 which is a blood thinner to help prevent further blood
5 clots.

6 Q. What was the purpose of the January 28th
7 meeting? What was the goal at that meeting?

8 A. The goal of the meeting was to -- the care
9 providers had exhausted all possibilities of having a
10 conversation around discharge with Ms. Bell. And the
11 goal of that was to set up this meeting so that we could
12 all gather together, address the concerns, answer the
13 questions that were asked to the best of our ability, and
14 then hopefully bring Ms. Bell to the decision that
15 Anastasia was stable for discharge.

16 Q. And did you tell Ms. Bell that her sister was
17 stable for discharge?

18 A. I assured Ms. Bell that the infectious disease,
19 the pulmonologist, the hematologist, internal medicine
20 doctor, cardiologist had all deemed Anastasia stable for
21 discharge.

22 Q. And so what was the response from Ms. Bell?

1 A. We had some more conversations around the
2 pericardial effusion. She had some questions that I was
3 able to answer.

4 Q. And these are subsequent the following day she
5 had further questions?

6 A. Yeah, there's some multiple emails after that
7 that I answered through the attorneys, I believe.

8 Q. And with that regarding an echocardiogram, and
9 were there any concerns about fungal infection?

10 A. The fungal infection was in Anastasia's mouth,
11 and the infectious disease specialist believed that is
12 being treated with Nystatin, that is an anti-fungal
13 liquid, and also they believed, based on medical records,
14 that that is because Anastasia's mouth is chronically
15 open, and you get that film that goes over your tongue,
16 when you keep breathing through your mouth.

17 Q. And so you responded to Ms. Bell's questions
18 then?

19 A. I responded through the attorneys.

20 Q. And then what was Ms. Bell's response after
21 that? Did she have anymore questions that --

22 A. I did not receive any further questions, via

1 email, from Ms. Bell.

2 MS. JOHNSTON: Thank you. I don't have any
3 further questions.

4 THE COURT: Any redirect?

5 MS. KIRKLAND: Yes, Your Honor.

6 REDIRECT EXAMINATION

7 BY MS. KIRKLAND:

8 Q. Dr. Betzelos, the incident of tachycardia in
9 January, is that something that would have alerted you
10 that Ms. Adams needed to remain in the hospital?

11 A. The episode of tachycardia, depending on its
12 ideology, which was investigated, resulted in the fact
13 that Anastasia remains stable for discharge.

14 Q. And the cardiologist who treated her agreed
15 with that opinion?

16 A. Yes, we do.

17 Q. And the oxygen issue that just happened over
18 the weekend we're discussing, is that something that a
19 skilled nursing facility could have addressed just as
20 well?

21 A. Yes.

22 MS. KIRKLAND: I have no further questions,

1 Your Honor.

2 THE COURT: All right. Is the doctor subject
3 to recall, or is free to go back to work?

4 MS. KIRKLAND: He's free to go.

5 MS. MORISI: Yes, Your Honor.

6 THE COURT: All right. Doctor, you are free to
7 leave. Thank you for coming in today.

8 THE WITNESS: Sure.

9 (Witness excused.)

10 THE COURT: Counsel, your next witness?

11 MS. KIRKLAND: Your Honor, I call Anita Hall.

12 THE COURT: Okay.

13 (Whereupon, the witness was duly sworn by the clerk
14 of the Court.)

15 Whereupon,

16 ANITA HALL,

17 a witness, called for examination by counsel for the
18 petitioner, and having been first duly sworn by the clerk
19 of the Court, was examined and testified as follows:

20 DIRECT EXAMINATION

21 BY MS. KIRKLAND:

22 Q. Good morning. Would you state your full name

1 for the record?

2 A. My name is Anita Hall.

3 Q. And where are you currently employed?

4 A. INOVA Fairfax Hospital.

5 Q. And what is your job title?

6 A. Clinical Case Manager.

7 Q. And can you briefly describe your job duties.

8 A. I help in reviewing the charts of discharged
9 patients; identify and address barriers to discharge and
10 help in that discharge planning.

11 Q. And how many years of experience do you have in
12 positions performing the title of duties?

13 A. Two years in case management, and prior to that
14 I was a nurse also to help discharge patients.

15 Q. And are you familiar with INOVA's discharge
16 planning efforts for INOVA's Fairfax's Hospitals patient
17 Anastasia Adams?

18 A. Yes, I am.

19 Q. And have you been involved in some of the
20 discharge planning?

21 A. Yes, I have.

22 Q. And has INOVA contacted an skilled nursing

1 facilities to inquire as to whether they would accept Ms.
2 Adams?

3 A. Yes, over 20.

4 Q. And when Ms. Adams was discharged back in
5 December to May of 2016, had INOVA lined up an
6 appropriate skilled nursing facility to accept her?

7 A. Yes.

8 Q. And which facility was that?

9 A. Gainesville Health and Rehab.

10 Q. And was this communicated to Ms. Bell?

11 A. We attempted to communicate with her, yes, by
12 messages.

13 THE COURT: Ma'am, what is it called,
14 Gainesville what?

15 THE WITNESS: Gainesville Health and Rehab.

16 THE COURT: And that was referred to as a
17 skilled --

18 MS. KIRKLAND: A skilled nursing facility. You
19 may have to speak up and into the microphone to be heard
20 a little better.

21 THE COURT: Thank you.

22 BY MS. KIRKLAND:

1 Q. I believe your last response was that you
2 attempted to communicate with Ms. Bell. What do you mean
3 attempted?

4 A. We made numerous phone calls to her and left
5 messages for her to call us back in response to the
6 acceptance of a facility.

7 Q. And did you hear back from her?

8 A. No.

9 Q. Could Gainesville Health and Rehab hold the bed
10 for Ms. Adams indefinitely?

11 A. No, they cannot, because they have other
12 patients that also need those beds, so if we do not get a
13 clear indication of their acceptance by a family member,
14 they cannot hold a bed.

15 Q. And since that time how many nursing facilities
16 has INOVA contacted with respect to Ms. Adams?

17 A. Over 20.

18 Q. And among these facilities, did INOVA contact
19 any for which Ms. Bell had expressed a -- (inaudible).

20 A. Yes, we did.

21 Q. And in the past 50 days, have any of these
22 facilities indicated they can accept Ms. Bell?

1 A. Yes.

2 Q. And has Ms. Bell authorized discharge to any of
3 them?

4 A. No.

5 Q. Can the facility's ability to accept Ms. Adams'
6 change on a daily basis?

7 A. Yes, it can.

8 Q. And why is that?

9 A. The question again, I'm sorry.

10 Q. What did it change day to day?

11 A. Depending on the bed availability.

12 Q. Did there come a time when you learned that Ms.
13 Bell would not consent to discharge unless the facility
14 would provide percussion therapy?

15 A. Yes, I did become aware of that.

16 Q. And is it your understanding that therapy is
17 not ordered as necessary by a physician?

18 A. Yes, that is my understanding.

19 Q. Nonetheless, did INOVA search for a facility
20 that provide that treatment at Ms. Bell's request?

21 A. We did try.

22 Q. And were any of the 20 facilities contacted

1 able to provide that therapy?

2 A. I do not believe so. I think one may have said
3 they would try, but they would need to be trained.

4 Q. And are -- based on your experience do you
5 believe a neutral professional guardian would be able to
6 facilitate this discharge process?

7 A. Yes, I do.

8 Q. And why is that?

9 A. Because we have been unable to get Ms. Bell to
10 participate in transferring her sister or assist in this
11 transfer.

12 Q. Are you aware of any other objections the
13 facilities may have in accepting Ms. Adams?

14 A. No.

15 Q. So the only impediment to her transfer has been
16 Ms. Bell's inability to authorize the transfer?

17 A. Yes.

18 MS. KIRKLAND: I have no further questions.

19 THE COURT: Cross-examination by the
20 intervener?

21 CROSS-EXAMINATION

22 BY MS. MORISI:

1 Q. Good morning, Ms. Hall.

2 A. Good morning.

3 Q. Ms. Bell had indicated that she had a
4 preference for a facility in Manassas called Birmingham
5 Green.

6 A. That's correct.

7 Q. Did a bed recently become available at
8 Birmingham Green?

9 A. Not to my knowledge.

10 Q. Okay. Were they one of the facilities who said
11 they couldn't do percussion therapy?

12 A. They had.

13 Q. Okay. To what was it Gainesville rehab
14 facility that said they could train someone to do?

15 A. I would have to re-look at my notes to be for
16 sure.

17 Q. Okay. How often do you talk to Ms. Bell?

18 A. Well, Ms. Bell has come late in the evenings,
19 and not during the day, so it's been hard to contact her
20 and have a direct conversation with her. But our social
21 worker has also tried to phone -- (unintelligible) and
22 have talked to her a couple of times.

1 Q. Okay. Would they give her a status as to what
2 facilities were being reached out to and --

3 A. Yes, they have.

4 Q. -- you know, we have a bed available?

5 A. Yes.

6 Q. Okay. Thank you.

7 MS. MORISI: I have no further questions.

8 THE COURT: Cross-examination by the guardian
9 ad litem?

10 MS. JOHNSTON: I don't have anything further.

11 THE COURT: Any redirect?

12 MS. KIRKLAND: No, Your Honor.

13 THE COURT: All right. Is the witness free to
14 leave?

15 MS. KIRKLAND: She is, but she is also here for
16 the clients.

17 THE COURT: Okay. All right, Ms. Hall, you can
18 have a seat next to counsel.

19 Your next witness, counsel?

20 MS. KIRKLAND: Your Honor, I have no further
21 witnesses.

22 THE COURT: All right. So is there anymore

1 evidence you wish to present?

2 MS. KIRKLAND: No, the petitioner would rest,
3 Your Honor.

4 THE COURT: Does the intervener have any
5 evidence in which she would like to present?

6 MS. MORISI: Yes, I'd like to call Ms. Bell.

7 THE COURT: All right.

8 (Whereupon, the witness was duly sworn by the clerk
9 of the Court.)

10 Whereupon,

11 YOLANDA BELL,

12 a witness, called for examination by counsel in her own
13 behalf, and having been first duly sworn by the clerk of
14 the Court, was examined and testified as follows:

15 DIRECT EXAMINATION

16 BY MS. MORISI:

17 Q. Ms. Bell, would you introduce yourself to the
18 Court, and tell the Judge a little bit about yourself.

19 A. My name is Yolanda Bell. I am Anastasia Adams
20 younger sister, my baby sister, the youngest of four. We
21 had two older brothers but one passed in '92. Our other
22 brother actually resides here, my brother Charles resides

1 here within the area.

2 I was the typical little sister always wanted
3 to tag after my sister, begging my mother to make her
4 take me with her. I wanted to be just like her. I have
5 always looked up to my sister.

6 In June of 2005 -- well, actually prior to that
7 my sister had become disabled. Not in the sense that she
8 is now, but she had a condition called Lycosidae Classic
9 Vasculitis, which is an inflammation of the blood
10 vessels, and can be extremely painful.

11 It's an autoimmune disorder and can be caused
12 by -- or it's within Lupus family I should say, or it can
13 also be the symptoms caused by an allergic reaction to a
14 medication which the -- eventually found out that that's
15 what was causing it.

16 There was a medication that she was taking was
17 causing some sort of a reaction within her system,
18 because since she stopped taking those medications in
19 2005 she hasn't had a flare-up or anything like that.

20 And so in 2003 she had an episode with the
21 Vasculitis, so she ended up with a blood infection and
22 ended up in the hospital in Arizona.

1 And at that time she actually made me her power
2 of attorney in 2003 because she -- since we had already
3 lost -- my parents had already lost a child, that that
4 wasn't a decision she wanted to put on my parents, so she
5 asked me being the youngest I would do that, and since I
6 was actually the one who cared for her, and my oldest
7 brother passed away in 1992.

8 Q. Do you want to tell us about her accident that
9 resulted in this?

10 A. In June of 2005, she suffered an accidental
11 acetaminophen overdose. The doctors in California
12 weren't communicating with one another and they had her
13 on various different medications. And at least one of
14 the medications, Vicodin, had acetaminophen in it, and
15 when she started spiking a fevers, they told her to take
16 Tylenol on top of that for the fevers.

17 And what happened is that it built up in her
18 system and her liver went toxic and she went into
19 multiple organ failure and respiratory failure and
20 cardiac arrest.

21 She was transferred to a hospital in San
22 Francisco, and because they initially thought she was

1 going to need a liver transplant, but all of that,
2 everything subsequent over her time in the hospital,
3 bounced back.

4 She had been incubated for 14 days, but bounced
5 back from that. Everything was perfect when she was
6 released from the hospital. She was walking, she was
7 talking, she was cooking her own breakfast.

8 The baseline that the hospital, that INOVA
9 seems to think is her baseline now, was not her baseline
10 with the brain injury. That became subsequent in 2007
11 when she actually wound up in a wheelchair again due to a
12 Virginia doctor this time had given her. That gave her
13 long term that was not supposed to be given for that
14 specific length of time.

15 Q. Okay.

16 A. And so --

17 Q. So in 2007 she came to the situation of reduced
18 mobility?

19 A. She was in a wheelchair, yes.

20 She was still speaking, although less
21 frequently at that time, because we would have
22 conversations where she described it like a veil coming

1 over her when this would happen. And so subsequently,
2 eventually she ended up to where she started having he
3 contractions and all. Because even at that time when she
4 was first in the wheelchair, there were times she was
5 walking with her walker, versus the -- in the wheelchair,
6 and she was speaking herself. I mean, she still does
7 that occasionally to this day. She has moments of
8 complete lucidity to where she will talk to you. She
9 will tell you everything that's been going on in the last
10 two weeks, and she was able to feed herself.

11 Q. Okay. In 2010 you sought out legal counsel for
12 your sister to execute a durable medical power of
13 attorney in advance, medical directive.

14 A. Right.

15 MS. MORISI: That was included with an
16 intravenous petition, Your Honor.

17 BY MS. MORISI:

18 Q. Can you give us the background that you had
19 executed that?

20 A. Yes, like I said previously, my sister had in
21 2003, and then again in the beginning of 2005 before the
22 brain injury, had effected two power of attorneys making

1 me her -- both, the first health power of attorney that
2 she did we were told by someone that -- my parents had
3 actually witnessed that one, and they said because they
4 were family that that wasn't necessarily valid. So the
5 beginning of 2005, I believe January or February, my
6 sister -- we went down and had another set done, both a
7 health power of attorney and a durable power of attorney
8 for property and finances done and notarized along with a
9 living will.

10 Q. Is that the document that you presented to the
11 hospital?

12 A. No, that one was -- I believe it was February
13 or actually could have been May of 2005, but it was
14 before her injury. Whatever time it was that year that I
15 actually visited, and I can't remember exactly. I'd have
16 to go back and pull those documents out.

17 Q. What is the latest one?

18 A. The latest one is the one in June of 2005. So
19 what we did was, we brought those and along with my
20 sister here in Virginia, because like I said she was
21 still having moments where she could talk to you. She
22 knew what was going on, and we took it to an elder law

1 attorney in Manassas. And they came out, they spoke with
2 my sister. They had actually seen her more than once, I
3 believe, and explained to her and she let them know that
4 she understood what was going on. They also looked at
5 the previous power of attorneys that she had executed,
6 and my assumption is that they took that into
7 consideration as well, but I can't speak for them.

8 MS. MORISI: Your Honor, may I have the bailiff
9 present or may I approach?

10 THE COURT: Yes, you can approach, counsel.
11 Thank you for asking.

12 (Whereupon, a document was presented to the
13 witness.)

14 BY MS. MORISI:

15 Q. This is the one I was referring to. Do you
16 recall that one?

17 A. Yes, I do. This is the one from 2005 that was
18 done here in Virginia.

19 Q. Would you check the date on the back of it,
20 please?

21 A. This was April 2, 2010.

22 Q. Okay. So is this the document that was

1 executed where they came down to the car?

2 A. Yes.

3 Q. You were just saying they came down and met
4 with her?

5 A. Yes.

6 Q. Okay.

7 A. The reason why they came down to the car is
8 because this particular office doesn't have a ramp or
9 anything to take her inside. It's a series of about 10
10 or 12 steps, and that's a little bit more than I can
11 carry her up in a wheelchair.

12 Q. And so that -- could you review that? That was
13 witnessed?

14 A. Yes, it was witnessed by two individuals that I
15 guess were also worked out of the same building or the
16 same law firm.

17 Q. Okay.

18 A. Carla -- excuse me, I can't -- Angie. Carla is
19 the one that was the notary, and Marie Woods, I believe
20 is her last name.

21 Q. Okay. So it was witnessed and notarized?

22 A. Yes, witnessed and notarized.

1 Q. Okay. And so your sister's condition now. How
2 would you say your sister's condition is now?

3 A. What do you mean?

4 Q. Today.

5 A. She is better than what she was when she was
6 initially admitted into INOVA Fairfax. As far as her --
7 she's not at what her baseline was before she entered the
8 hospital.

9 Q. What is her baseline? What would you say is
10 her baseline?

11 A. Her baseline is that my sister is alert. My
12 sister understands everything that you say to her. She
13 may not necessarily be able to communicate back with you
14 at specific times, but she understands everything that is
15 going on, and she does communicate via expressions.
16 She'll blink once for yes, twice for no. She will nod
17 her head, and her weight is drastically less than what it
18 was from what the normal weight is. The normal weight is
19 approximately 120 to 125 pounds, and she appears gaunt,
20 but she does look better than she did when she was
21 admitted.

22 Q. All right. Why did you disagree with the

1 discharge in December and January and early February?

2 A. I initially disagreed with the discharge
3 because I felt that my sister was still at risk. When
4 they initially came with the discharge at the end of
5 December, she had a very large pericardial effusion. It
6 wasn't small; it wasn't minor, and it was hemodynamic
7 involvement, meaning that it's pushing on one of the
8 ventricles of the heart so you're not getting full blood
9 flow. And that is listed in their actual echocardiogram
10 that they did on the 21st.

11 It mentions that it was larger on the backside.
12 I'm confused with the understanding of the terms
13 interiors; sometimes maybe that's from the back, but
14 whichever side that is pointing to, and that one of the
15 ventricles of her heart was not filling fully because of
16 this. And when that happens you have fainting, you're
17 not getting sufficient oxygenated blood flowing through
18 your body.

19 And so that was a concern, that and the DBT,
20 the blood clot that she had in her upper right arm was,
21 at that time, 12 inches long, and they didn't want to
22 treat it. I asked why, and they just -- it was Dr.

1 Balaji first, and he just said we are not going to treat
2 it because invasive procedures carry an inherent risk,
3 and I do understand that.

4 And I did understand why they would not do the
5 blood clot because they weren't sure if there was blood
6 in the fluid that was around the heart; and by giving her
7 a blood thinner that could increase the bleeding, which
8 makes perfect sense; that's logical. But when I asked
9 they would not even test the fluid to see if there was
10 blood in it.

11 And I kept getting different answers and
12 conflicting answers back and forth about why they would
13 or they wouldn't, and when I asked regarding it can also
14 be treated via medication, Dr. Balaji said he couldn't do
15 that either.

16 So the only conclusion that I could come to is
17 that because -- and this is my opinion, my opinion based
18 upon what I read in the medical records and conversations
19 I had with a couple of the doctors, that the reason is
20 they did not think she had any quality of life. In fact
21 there is a statement in her medical records by one of the
22 physicians in the care team that he does not believe that

1 she would want to live this way.

2 And lastly, based upon everything that they see
3 with my sister, the brain injury, the contractions, the
4 fact that she's in the wheelchair, all of that's been
5 done by the medical field, so I question everything that
6 doctors tell me now.

7 Every medication they give her, I question
8 because if not for the doctors in California and not
9 paying attention and talking to each other, they wouldn't
10 have had her taken the Tylenol on top of it. It wouldn't
11 have shut her liver down. She wouldn't have ended up
12 with a brain injury. That's also why she was in the
13 hospital down there. It wasn't necessarily the Tylenol
14 that did it, they gave her the wrong medication when she
15 was in the hospital, which -- and the day after was the
16 difference in her mental capacity to where you could see
17 it, she was child-like the next day where she wasn't the
18 day before.

19 Q. You want your sister to be in the hospital?

20 A. No, I want my sister to be home with me. My
21 sister wants to be at home. So I miss my sister. I
22 mean, because we stay together. She knows when I'm

1 having a hard day. She knows -- excuse me. She knows if
2 I had a hard day or if I'm stressed about something. She
3 has her ways of making me laugh. I mean, she'll put a
4 certain expression on her face where she smiles with her
5 tongue; a specific way sticking her tongue out at me that
6 will automatically make me laugh, because she knows when
7 there is something wrong.

8 I've developed a habit of whenever we're in the
9 same room together, or in the house together, that I'm
10 talking out loud as to what I'm doing so she knows where
11 I'm at, and I'm including her in every single thing that
12 I'm doing, every conversation that I am having, or any
13 decisions that I am making.

14 So she knows what's going on. She doesn't know
15 who Ms. Johnston is, but she knows when she came in and
16 read the petition to her. When I got there later that
17 day, my sister was terrified. She -- and this is the
18 first time she has done this since her hospitalization; I
19 walked in and the room nurse came in actually right after
20 me as well and the regular nurses that she's seen pretty
21 much everyday since she's been there, she literally drew
22 up and towards me, and that's the first time I've seen

1 her do that in the hospitalization. I mean, because she
2 gets poked and prodded, she's somewhat used to it. No
3 one likes it, but she's used to it. So, no, I want her
4 home with me. That's where she was before. That's where
5 she's happiest and frankly, that's where she will get the
6 best care.

7 Because at least up until her -- shortly before
8 this hospitalization or the one in Reston, she had people
9 coming in. We were on the waiver program, and we had
10 skilled nursing for the skilled respite, we had an RN
11 that came in, we also had an aide that came in during the
12 week.

13 So a perfect example of the care she gets at
14 home versus the care she gets in the hospital or a
15 skilled nursing facility, my sister has been in that
16 wheelchair since 2007, so we're looking at ten years.

17 Up until her hospitalization at Reston or
18 transferred the release, messed up transfer to Potomac
19 Falls Nursing Facility, my sister has never had a bed
20 sore; never had skin break down. My sister was in that
21 place ten days and within a two-day period came out with
22 a grave bed sore that was about the size of a quarter, to

1 where you're down to the white skin and all of that
2 underneath it, and the red and bleeding. And I can say
3 it was within a two-day period because that Monday I had
4 taken my sister out for a doctor's appointment and I'm
5 the one that actually cleaned her up and got her dressed.

6 And on Tuesday and Wednesday I had
7 appointments for myself that I needed to go to because I
8 had to -- I actually was sleeping at the skilled nursing
9 facility because the paramedics did not want to leave my
10 sister there because that place was that bad. It did not
11 feel safe and almost turned around and took her back to
12 Reston Hospital, but we were able to gerry-rig something
13 with the bed to make her marginally safer until they
14 could get another bed in.

15 And so on that Tuesday and Wednesday I had
16 appointments. That Thursday is when she wound up in the
17 emergency room and went there and she had this quarter-
18 size bed sore.

19 Q. Okay. So your plan ultimately is for her to
20 return to the home with you with the care --

21 A. Yes.

22 Q. -- that you just mentioned?

1 A. Yes.

2 Q. Skilled and the nurses aides --

3 A. Yes.

4 Q. -- who can attend to her?

5 A. Yes.

6 Q. If there needed to be a stay in a skilled
7 nursing facility --

8 A. A very brief stay.

9 Q. Okay, you would agree to the stay in the
10 nursing facility or --

11 A. Depends on which one, a very brief stay. There
12 are nursing homes. I have been researching and dealing
13 with nursing homes for the last 11 years.

14 Now, there are good and there are some that are
15 really not very good, and based upon the federal -- the
16 Medicare when they come in and do their inspections,
17 there are a few nursing facilities in the area that have
18 within their inspections verified complaints of patient
19 abuse, patient neglect and my sister not being able to
20 speak for herself at times, or people assuming that she
21 doesn't know what's going on around her, because she
22 cannot push the button or call admin, she gets neglected

1 or ignored.

2 There was one particular nursing facility
3 within the area that when I had to travel on business,
4 before I retired, they -- what they had done, my sister
5 was completely sore when I got there, had been obviously
6 for a while, and they had medicated her so much that she
7 slept for 24 hours.

8 They do that because as Dr. Balaji says that
9 the staff becomes alarm fatigued, or they also can become
10 fatigued from a patient that is making just noises, and
11 that is my sister's way when she is not able to speak
12 because her voice when she speaks is very low, to get
13 their attention to let them know that something is going
14 on. And you have to be around her for a while to know
15 what the difference specific noises mean. Whether or not
16 she wants to be changed, or she's in pain, or she's
17 uncomfortable, or she just doesn't want to do what you
18 are asking her to do.

19 Q. Okay. The percussion therapy; you have been
20 quite persistent about it?

21 A. Yes, I have been persistent about the
22 percussion therapy because she came into the hospital

1 with percussion therapy, chest PT order. She was given
2 chest PT at Reston Hospital, she was given chest PT at
3 the nursing facility that she was in. Dr. Baid, B-A-I-D,
4 is the pulmonologist at INOVA Fairfax that initially was
5 seeing my sister, and he's the one that did the
6 bronchoscopy that actually cleared all of the gunk out of
7 her lungs.

8 And speaking of that when they did that, my
9 sister -- she looked so comfortable when she came back,
10 it's like I can breathe again. Looked completely at ease
11 and not in any type of distress, and it's the best I've
12 seen her in months. And he is the one in her initial
13 order that stated for her to have the chest PT.

14 And in every progress note whether it be from
15 pulmonology, infectious disease or even one of the other
16 specialties that came in, all stated continue chest PT.
17 This is the first order that I've seen that hasn't had
18 that in there; the one that was printed yesterday.

19 Q. Okay. Can you just describe for the Court what
20 this piece of equipment is?

21 A. It is a hand-held device approximately 10
22 inches in diameter. There's two different types, there's

1 an electrical one that plugs into the wall, and then
2 there's one that works on the hospital room there or on
3 the portable compressor. And you hold that, and what
4 that does is it repetitively beats on the area, provides
5 a percussion, and it has variable speeds. But it is more
6 than just a back massager type of thing that you work
7 over the lungs, and it helps to loosen, and helps her
8 move the mucus to get it out, and it keeps her left lower
9 lobe from re-collapsing because of the mucus that's in
10 there. But without this, because of the aspiration that
11 she gets -- it's a small amount over time; this isn't
12 something that happens immediately, that it will build up
13 and it will compress, it will collapse again. And
14 generally percussion therapy is the only way to prevent
15 it and get it to open outside of doing an invasive
16 procedure, like a bronchoscopy, putting her under
17 sedation and going down and actually removing the mucus
18 itself, suctioning that out.

19 Q. So you would say, despite the medical -- Dr.
20 Balaji saying this wasn't a standard of care, you feel
21 this is a standard of care for your sister for prolonged
22 health?

1 MS. KIRKLAND: Objection, Your Honor.

2 THE COURT: Sustained.

3 MS. MORISI: Okay.

4 THE COURT: She's not an expert. She can't
5 testify to standard of care unless you establish that she
6 has some medical training.

7 MS. MORISI: Fifteen years of taking care of
8 her sister since 2005, but --

9 THE COURT: Counsel, do you have any citation
10 in the country that would support that proposition?

11 MS. MORISI: No, I respect your decision to --

12 THE COURT: It's not my decision. Do you have
13 any case in the country that would support what you just
14 said?

15 MS. MORISI: No, I don't.

16 THE COURT: Please proceed.

17 BY MS. MORISI:

18 Q. The availability events, Ms. Hall talked about
19 availability events. Have you ever been informed?

20 A. Other than the Gainesville bed early on, no, I
21 have not. There's been numerous conversations going on
22 between the attorneys, Delegate Marshall and myself, and

1 Maureen and other hospital personnel regarding the
2 situation with my sister. And we were told -- Delegate
3 Marshall was told, as I believe --

4 MS. KIRKLAND: Objection, hearsay. I believe
5 she is reporting what Delegate Marshall was told.

6 THE COURT: I sustain the objection.

7 THE WITNESS: Okay, I'm sorry.

8 THE COURT: Ma'am, leave out what Delegate
9 Marshall may have spoken with somebody about.

10 THE WITNESS: Okay, I was told that -- or I was
11 not told -- I was told that a bed at Birmingham Green had
12 come available, but after the fact, it had been given
13 away, and so I had no knowledge that this bed was
14 available because had that bed -- had I known that that
15 bed was available at that time, that is my chosen
16 facility because it's closer to where we live, it is
17 closer to our church, and to where more people could come
18 to visit her throughout the day. She could see people
19 that she's used to seeing on a regular basis, and had I
20 known about that, she would be there now.

21 But that is not something I was told about and
22 was not able to make that decision. My decision -- my

1 capability was taken from me even though I am her legally
2 designated power of attorney, and have been for many
3 years.

4 A meeting was held on the 6th of January with
5 case management, Anita, Dr. Kelly Armstrong, Dr. Duncan,
6 and one other woman from the finance department, I
7 believe. Basically, they -- I was under the impression
8 that when I spoke to Dr. Armstrong that the meeting was
9 going to be to answer my medical questions. And when I
10 got there I was flattened, flat out told that, no, we are
11 not here to answer your medical questions. We are here
12 to get you to agree to discharge your sister by 8 p.m.
13 tonight. We have already arranged an ambulance to come
14 and get her at 8 p.m., so we don't want to hear anything
15 that is outside of that purview.

16 And I reiterated at least three times during
17 the hour that we were in the room, and they again told
18 me, no, they were not interested. That time had come and
19 gone, that they had answered all the questions they were
20 going to answer, and that if I didn't agree to her
21 discharge, they were going to sue me and take me to court
22 for guardianship. That is also what Dr. Armstrong said

1 to me during the phone conversation that we had the day
2 before when we scheduled that meeting, because she
3 initially stated that they were taking me to court for
4 guardianship, for abandonment for my sister. I'm at that
5 hospital every single day.

6 As a matter of fact, with everything I had to
7 do yesterday, I didn't get there until very late, but I
8 went to the hospital at one o'clock this morning. I'm
9 surviving on maybe an hour-and-a-half sleep, because I
10 slept in the chair at the hospital, which is not uncommon
11 for me to do.

12 And so after not being able to come to an
13 agreement on the 6th, the nursing staff, in my presence,
14 were promptly told they were not to share any health
15 information with me at all about my sister. And in fact,
16 I stood and witnessed them -- there are machines on the
17 wall that's their blood pressure test, the thermometer,
18 and they have a pulse ox that goes on her finger for her
19 oxygen levels. I witnessed the nurse disconnect it and
20 throw it away, so I could not see anything that was on
21 the monitor.

22 My sister, during this time, came down with an

1 infection. I had no idea what the infection was. I
2 didn't know if she was being treated because I would ask
3 the nurses and they would tell me we are not allowed to
4 give you the information. And it's stated in her chart,
5 and within her charts there's a note from Dr. Armstrong
6 actually addressed that.

7 As far as information, it's not that -- not
8 contacting the doctors after a certain time, that came
9 later. The initial one was that because we are pursuing
10 guardianship that they were not to share any medical
11 information with me.

12 Later, they made the decision that it was not
13 to be after 5 o'clock, but when I called -- when the
14 doctor was paged, the doctor that has provided the report
15 here, was contacted in regards to a medical question. I
16 was promptly told, and there is also a note here within
17 the records that addresses this, that I was to call Dr.
18 Armstrong and get the medical information from her. But
19 Dr. Armstrong is a PhD, she is not an M.D., so I found it
20 quite strange that an M.D. was telling me that I needed
21 to talk to a PhD to get a medical information on my
22 sister.

1 Dr. Armstrong is actually chief of the ethics
2 department and clinical observation, I think is her
3 title, or something to that effect.

4 Q. All right. Ms. Bell, do you think your sister
5 needs a guardian?

6 A. No, I think we have been doing quite well with
7 the power of attorney, but I do understand in Virginia
8 that they are not one in the same, they are different.
9 In California it's pretty much the same thing, and I
10 definitely don't believe she needs a guardian that's
11 outside of the family if she does need one.

12 It should be someone who knows her, and someone
13 that loves her, and that is going to do the best for her;
14 that knows what her religious beliefs are, that knows
15 what her personal values are. That knows enough about
16 her that can make these decisions, and during those
17 periods of times where she is not -- because there is
18 about five-percent of the time that she is not really
19 able to communicate with you at all. There is something
20 that seizes in her brain that prevents her from -- I
21 guess --

22 MS. KIRKLAND: Objection, foundation.

1 MS. MORISI: Oh, I'm sorry. Your Honor, I'm
2 ready to -- those are my questions.

3 THE WITNESS: May I say something?

4 THE COURT: I'll sustain the objection. Next
5 question, ma'am.

6 THE WITNESS: I spent a year --

7 THE COURT: No, there's not a question pending.
8 Counsel, your next question.

9 MS. MORISI: I'm going to -- I've come to my
10 end.

11 THE COURT: Okay, very good.

12 Cross-examination.

13 MS. KIRKLAND: Yes, Your Honor.

14 CROSS-EXAMINATION

15 BY MS. KIRKLAND:

16 Q. Morning, Ms. Bell.

17 A. Good morning.

18 Q. Prior to her admission to INOVA Fairfax
19 Hospital, where was Ms. Adams immediately prior?

20 A. She was at Potomac Falls Health and Rehab
21 Center there in Sterling, Virginia.

22 Q. And did she go to INOVA Loudoun in between?

1 A. They took her from Sterling, Potomac Falls to
2 Loudoun because the ambulance did not directly bring her
3 to Fairfax.

4 Q. And who made the decision then to transfer her
5 from INOVA Loudoun Hospital to INOVA Fairfax Hospital?

6 A. I did after speaking with the director of the
7 E.R. and her letting me know that INOVA was a higher
8 standard of care, and if it were her family member, she
9 would have done the same thing.

10 Q. Prior to transferring Ms. Adams to Fairfax
11 Hospital, were you advised that there was no medical
12 reason to transfer her?

13 A. No, I was advised that Medicare would not pay
14 for it.

15 Q. And you were advised that there was a risk of
16 transfer due to her state at the time, with a fever and
17 pneumonia?

18 A. I was advised that there was a risk if I put
19 her in my car and transferred her that way. I paid for
20 the ambulance to take her.

21 MS. KIRKLAND: Your Honor, I'd like to mark
22 this as Petitioner's Exhibit C.

1 THE COURT: All right.

2 (The document referred to above was marked
3 Petitioner's Exhibit C for
4 identification.)

5 (Whereupon, a document was presented to the Court
6 and the witness.)

7 MS. KIRKLAND: Thank you.

8 BY MS. KIRKLAND:

9 Q. Ms. Bell, do you recognize this form that has
10 been marked as Exhibit C?

11 A. It appears to be from her records at INOVA
12 Loudoun.

13 Q. Do you see as patient representative, is that
14 your signature?

15 A. I believe so. The printing under relationship
16 is definitely my writing.

17 Q. And you understand that this form -- in this
18 form you are certifying on behalf of Ms. Adams that she
19 was leaving the hospital at Loudoun against the advice of
20 the attending physician and hospital administration?

21 A. This is an AMA that all hospitals if you leave.

22 Q. If you leave against medical advice, correct?

1 A. If they can give you the same standard of care
2 to where you are going to, yes.

3 Q. Ms. Bell, in this form by signing it, it states
4 that you acknowledge that you have been informed of the
5 risks involved and release the attending physicians,
6 hospitals and its employees from all its responsibility
7 for any ill effects the -- (unintelligible), correct?

8 A. The form says that, yes.

9 Q. And so you understood that by signing this you
10 were leaving the hospital with Ms. Adams against the
11 advice of her attending physicians and hospital
12 administration at INOVA Loudoun Hospital?

13 A. No, I was removing my sister, or transferring
14 my sister based upon the conversation that I had with the
15 emergency room director. I can't remember what her name
16 was; it's on one of the other forms in here, in one of
17 her notes regarding the conversation that she had with me
18 that -- since she was being transferred within an
19 ambulance with all of her IVs and everything intact,
20 there was a risk; but having the ambulance and the
21 paramedics that transferred her, that it mitigated those.

22 Q. And this was not the attending physician that

1 you had this conversation with?

2 A. This was the attending physician supervisor.

3 MS. KIRKLAND: Your Honor, I'd move Exhibit C
4 into evidence.

5 THE COURT: Any objection?

6 MS. MORISI: No objection.

7 THE COURT: The Court will receive Petitioner's
8 Exhibit C.

9 (The document referred to above was marked
10 Petitioner's Exhibit C for identification
11 and was received into evidence.)

12 BY MS. KIRKLAND:

13 Q. You mentioned that upon transfer, Medicare
14 would not cover it. Is that correct?

15 A. They would not cover the ambulance ride because
16 she was already at a facility, and which we would have
17 done from the nursing facility directly from there to
18 INOVA Fairfax. However, I was told by the nursing staff
19 at Potomac Falls that it would take them a good 45
20 minutes to an hour for LifeCare to get there to remove
21 her from -- to Fairfax. At that time her temperature was
22 still rising.

1 Q. Just answer my question; Medicare wouldn't
2 cover it because the transfer was not medically
3 necessary, correct? Yes or no.

4 A. They wouldn't cover it because she was already
5 in a facility where she could receive care.

6 Q. And she receives Medicare A & B as well, it's
7 Kaiser insurance, correct?

8 A. Correct.

9 Q. Did you seek treatment for her other than the
10 Kaiser network?

11 A. No.

12 Q. And why not?

13 A. Because of issues that we had with the Kaiser
14 doctors at Reston Hospital when she was hospitalized
15 there.

16 Q. And so by admitting her into INOVA, she would
17 be out of plan, correct?

18 A. She would be out of Kaiser's plan, but Medicare
19 would still cover her.

20 Q. And when electing that --

21 MS. KIRKLAND: Actually, I'd like to make this
22 Exhibit D.

1 (The document referred to above was marked
2 Petitioner's Exhibit D for identification.)

3 BY MS. KIRKLAND:

4 Q. Do you recognize this form, Ms. Bell?

5 A. This is the form that was given to me. I
6 believe this is the same form that was given to me by the
7 Kaiser representative or somebody there at the admissions
8 department.

9 Q. And this is your signature on the form?

10 A. It is.

11 Q. And you're signing as power of attorney and her
12 sister?

13 A. Correct.

14 Q. On behalf of Ms. Adams, correct?

15 A. Correct.

16 Q. And so by signing this you were obligating Ms.
17 Adams to elect to use out-of-network, out-of-trans
18 benefits, and accept any responsibility for any financial
19 penalties, correct?

20 A. I was -- that's what it says here, but I was
21 accepting -- she has Medicare part A & B, so Medicare --
22 because she has Medicare, and the way that the Kaiser

1 program is managed, she does not have to use them. Now,
2 she will be responsible for paying co-pays that would be
3 responsible at the hospital, but Medicare takes care of
4 her hospitalizations.

5 Q. And so once you signed this form, her only
6 remaining covering at INOVA Fairfax Hospital is Medicare?

7 A. Correct.

8 Q. On December 28, 2016, you learned INOVA Fairfax
9 Hospital cleared Ms. Adams for discharge?

10 A. What date was it?

11 Q. December 28th.

12 A. I'm not sure of the date, but it was somewhere
13 around the end of the month.

14 Q. Well, on December 28th doesn't seem -- do you
15 recall contacting KEPRO which manages her Medicare to
16 appeal the decision to discharge her?

17 A. I don't remember the exact date, but it was
18 around -- it was the last week in December.

19 Q. Okay. And you contacted KEPRO to appeal. Why
20 did you do that?

21 A. Because I did not agree with the discharge,
22 that she -- with the medical that she had with the blood

1 clot, and with the pericardial effusion.

2 Q. And based on that appeal, Medicare denied the
3 appeal and denied further coverage at INOVA Fairfax?

4 A. KEPRO denied it, yes.

5 Q. KEPRO on behalf of Medicare?

6 A. KEPRO is the contract -- the state contracted
7 organization that's a quality assurance organization.
8 They are not part of Medicare; they don't work for
9 Medicare.

10 Q. Is KEPRO the one that handles the appeals
11 though, whether the Medicare benefits continue to apply?

12 A. They handle the appeals for discharges, yes.

13 Q. And based on their review after December 30,
14 2016, Medicare no longer covered Ms. Adams at INOVA
15 Fairfax Hospital, correct?

16 A. They left me a voicemail saying that they had
17 agreed with the hospital, and that I could file for leave
18 for consideration.

19 Q. And you filed for reconsideration?

20 A. I did.

21 Q. And they denied that as well?

22 A. I don't know exactly how many days later, but

1 yes, they did. In which time I appealed it to Medicare
2 itself, and is now with the Administrative Law Judge.

3 Q. KEPRO as they make their decisions based on
4 independent position review, correct?

5 A. That's a matter of opinion.

6 Q. Is that what you understand from their
7 communications to you?

8 A. I don't recall them telling me that they were
9 independent, but they have two separate doctors that
10 looked at the initial one, and the other one looked at
11 the reconsideration. If that's what you mean?

12 Q. And both physicians agreed that she no longer
13 required acute medical care at a hospital facility,
14 correct?

15 A. Yes, and they did the same thing at Reston, and
16 Reston was overturned by the Administrative Law Judge.

17 Q. Ms. Bell, you mentioned you didn't know about
18 the bed at Birmingham Green. How many times has a social
19 worker or case manager from INOVA contacted you to
20 discuss discharge?

21 A. I don't know the number off hand. I would have
22 to log on my phone to tell you.

1 Q. About how often then would you say?

2 A. Well, initially when they started calling me,
3 and I wish I could -- I believe her name was Cathy. She
4 called me actually every 20 minutes over a four or five-
5 hour or six-hour period to the point where I had to turn
6 my phone off because I was trying to get some work done
7 for the Federal Court in D.C.

8 Q. In speaking with any social worker, case
9 manager from INOVA, have you consented to discharge to
10 any facility?

11 A. Not before my medical questions were answered,
12 but that was the initial thing we were going through.
13 This was before the January meetings; January 26th or
14 28th meeting, whenever that was. Because whenever I
15 would ask a question I was told, well, that's a
16 specialist's question, so you need to answer them, but
17 yet they could box me into a corner that you can only ask
18 questions between the certain hours and -- I mean, there
19 were times that -- it took Dr. Balaji well over a week to
20 get back with me regarding the pericardial effusion. And
21 then the DBT he referred me to the hematologist.

22 Q. So to date you have not gone to meet with any

1 social worker or case manager to find an appropriate
2 facility for Ms. Adams?

3 A. No, that's not true. I have met with Michelle.
4 I don't know if Lindsay is part of their office or not,
5 but she and I had a long conversation. The meeting that
6 we had on the 6th of January with Anita, Dr. Armstrong,
7 Dr. Duncan; all who are part of case management. I've
8 left Michelle phone messages. I've spoken to her maybe
9 twice on the phone, possibly three times.

10 Q. And so I believe you testified on direct that
11 you had not been hearing from them. You had in fact had
12 multiple phone calls and meetings with various personnel
13 at INOVA about discharge options?

14 A. Only, actually Michelle and then Anita at that
15 meeting. The others, the calls I received have been
16 messages, and only once or maybe twice have I actually
17 been asked to call somebody back knowing that I was going
18 to be at the hospital. There was a social worker and I
19 don't know her name, but came somewhere around 6:00 or
20 7:00 and spoke to me, but again this was before the
21 meeting where we sat down with the doctors and the rest
22 of them had gotten information. And at that point I had

1 already spoken to Dr. Armstrong, and we were waiting for
2 additional information, or were waiting for the order for
3 (unintelligible) or for something. I can't recall
4 exactly what it was but.

5 Q. Ms. Bell, sitting here today, do you have a
6 discharge plan for Ms. Adams?

7 A. A discharge plan?

8 Q. Meaning do you have a facility in mind where
9 she could go? Have you made any arrangements to
10 facilitate a transfer for her to that facility?

11 A. I can't go into a facility and ask them and say
12 that I want to transfer her here. From a direct hospital
13 to a facility transfer, that comes from you guys and your
14 office. Now, I've gone and looked at different
15 facilities. I've looked at Gainesville. I've gone and
16 looked at the Manassas Health Rehab. There was one other
17 one, I can't remember, aside from Potomac Falls, there
18 was one other one that I went to look at and got a tour
19 of. So I've gone and actually looked at these places,
20 yes.

21 Q. And following that tour, did you go to social
22 worker, case manager at INOVA and try to facilitate any

1 specific transfer to any specific facility?

2 A. That's how I let them know there were certain
3 ones that I would not have her sent to.

4 MS. KIRKLAND: No further questions, Your
5 Honor.

6 THE COURT: All right. Are they any cross-
7 examination questions from the GAL?

8 MS. JOHNSTON: No, Your Honor.

9 THE COURT: All right. Any redirect?

10 MS. MORISI: No, Your Honor.

11 THE COURT: All right, ma'am, you can have a
12 seat next to counsel.

13 (Witness excused.)

14 THE COURT: Counsel, your next witness?

15 MS. MORISI: I have no further witnesses, Your
16 Honor.

17 THE COURT: All right, do you have any evidence
18 you wish to present?

19 MS. MORISI: No, Your Honor.

20 There was a paper left up there if we could
21 have that back. That was not put into evidence.

22 THE COURT: Okay.

1 (Whereupon, a document was returned to counsel.)

2 THE COURT: All right, does the guardian ad
3 litem have any evidence she wishes to provide?

4 MS. JOHNSTON: Your Honor, I'd to admit my
5 report into evidence.

6 THE COURT: All right, Madam Clerk, let's have
7 the GAL report admitted into evidence.

8 (The document referred to above was
9 marked for identification and received
10 into evidence.)

11 THE COURT: Does the Petitioner have any
12 rebuttal evidence she wishes to present?

13 MS. KIRKLAND: Your Honor, I may. Would it be
14 possible to take a very brief recess just so I can
15 determine whether we need to rebut anything?

16 THE COURT: Yes, we could take a -- well, I
17 usually take a 10-15 minute recess in the morning. We
18 got started a little late, so why don't we take a 10-
19 minute recess.

20 If you have nothing else, then we'll go to
21 closing arguments.

22 MS. KIRKLAND: Great, thank you, Your Honor.

1 (Whereupon, at approximately 12:08 p.m. a brief
2 recess was taken, and resumed at approximately 12:22
3 p.m.)

4 THE COURT: Counsel, do you have any rebuttal
5 evidence you wish to present?

6 MS. KIRKLAND: Yes, Your Honor. I'd like to
7 call Kenneth Labowitz for a few brief questions.

8 THE COURT: Okay.

9 (Whereupon, the witness was duly sworn by the clerk
10 of the Court.)

11 THE COURT: Counsel, please proceed when ready.

12 Whereupon,

13 KENNETH E. LABOWITZ, ESQ.,
14 a witness, called for examination by counsel for the
15 petitioner, and having been first duly sworn by the clerk
16 of the Court, was examined and testified as follows:

17 DIRECT EXAMINATION

18 BY MS. KIRKLAND:

19 Q. Mr. Labowitz, would you state your full name
20 for the record?

21 A. Kenneth Labowitz.

22 Q. And are you a proposed guardian and conservator

1 in this case?

2 A. That's what I understand, yes.

3 Q. Along with whom?

4 A. Along with my partner and my law firm, Anne
5 Heishman.

6 Q. And can you describe very briefly for the Court
7 your experience in performing these exercises?

8 A. Sure. Since 1993 I have been appointed as
9 guardian and conservator for one or the other in hundreds
10 of cases. Since 2003 this has been my only practice. We
11 litigate matters of estate administration and
12 guardianships. Anne and I are now guardians, I think for
13 something like 120 people. We do keep track of them; we
14 give them numbers, I think that's what the census is.

15 Q. And how many persons do you think you've served
16 as guardian and conservator for in your career?

17 A. At one point I counted 900. It's probably over
18 1,000 now.

19 Q. And if you're appointed by the Court to serve
20 as a guardian and conservator for Ms. Adams, what would
21 be your plan of discharge?

22 A. I've talked to people, Ms. Hall and the other

1 people that have been involved in her care to see what it
2 is that they think she needs. Obviously, I have talked
3 to Ms. Bell to see -- I've heard today many of her
4 objections. They need to figure out what places that I
5 won't send anyone so see if she and I agree on where we
6 should avoid.

7 It is not a simple process in simply saying she
8 should go to Birmingham Green for example. There has to
9 be a bed at the level of care that Ms. Adams needs. So
10 it is something of a moving target as to what facility
11 has what bed available when.

12 And my goal would be to identify a place that
13 can provide the quality of care that Ms. Adams needs. I
14 get that Ms. Bell wants to be close to Manassas to her
15 home, if that's possible, that works. It may not be
16 possible. It's not something that I can control or
17 anybody can control. It's the market whether there is a
18 supply of beds in place that is acceptable to provide the
19 care that Ms. Adams needs.

20 Q. And are you willing to serve along with your
21 partner, Ms. Heishman as a guardian and conservator for
22 Ms. Adams?

1 A. I am, yes.

2 Q. Thank you.

3 MS. KIRKLAND: I have no further questions,
4 Your Honor.

5 THE COURT: Cross-examination by the
6 Intervenor?

7 MS. MORISI: Yes, thank you, Your Honor.

8 CROSS-EXAMINATION

9 BY MS. MORISI:

10 Q. I guess it's good afternoon.

11 A. Yes, it is.

12 Q. If the Court so chose, would you agree to serve
13 with Ms. Bell, another guardian?

14 A. That's a difficult question. Typically we do
15 not just because it's the idea of taking votes and
16 deciding by -- you know, we have two votes and she has
17 one vote. That's really not going to work.

18 Certainly, I can hear the commitment that she
19 has to her sister, and I am happy to communicate with Ms.
20 Bell to the extent that if we get to a place that is
21 available and that works, I think that somebody needs to
22 be a decision maker. I think someone -- or Anne and I

1 need to be the decision makers. I don't think anybody
2 else -- it just doesn't work to have a committee and a
3 consensus.

4 Q. Do you foresee a limited guardianship?

5 A. I don't really know what that means. If what
6 we are talking about is moving Ms. Adams into some sort
7 of care facility where there is an available bed, and
8 continuing that until some time in the future, that
9 works.

10 We regularly initiate and carry through
11 terminations of guardianships. We've been here as
12 recently as a couple of weeks ago where somebody had
13 reached the end of the need for a guardian and the Court
14 ruled that the guardianship should be terminated.

15 I get that Ms. Bell is very closely connected
16 to her sister's care. I get it that Ms. Bell is probably
17 going to have questions for me and recommendations for
18 me, and for the staff at whatever facility Ms. Adams ends
19 up at. I don't really understand how it would work for
20 three of us to be guardians together, and limited with --
21 I don't know what the limitation is. It's just a matter
22 of having Ms. Adams admitted to a facility, and until

1 some future event happens. That's okay, I understand.

2 Q. Right, by need or change in circumstance?

3 A. Sure. And the Court is here every Friday
4 morning to hear changes in circumstances, changes in
5 appointments, and I know the way to the courthouse, so.

6 Q. Thank you.

7 MS. MORISI: Nothing further, Your Honor.

8 THE COURT: Cross-examination.

9 MS. MORISI: Excuse me, may I consult with my
10 client?

11 THE COURT: Of course. Take your time.

12 (Discussions off the record not reported by the
13 court reporter.

14 MS. MORISI: No further questions, Your Honor.

15 THE COURT: All right. Cross-examination by
16 the guardian ad litem?

17 MS. JOHNSTON: I don't have any questions.

18 THE COURT: All right. Any redirect?

19 MS. KIRKLAND: No redirect, and no further
20 evidence, Your Honor.

21 THE COURT: All right, counsel, you may have a
22 seat.

1 THE WITNESS: Thank you.

2 THE COURT: Thank you.

3 (Witness excused.)

4 THE COURT: Bear with me for just a moment,
5 counselors.

6 (Brief pause.)

7 THE COURT: All right, let's proceed with
8 closing arguments for the petitioner.

9 MS. KIRKLAND: Good afternoon, Your Honor.

10 As I mentioned in opening, the standard of this
11 petition is set forth in Virginia Code Section 64.2-2007,
12 and it sets forth seven factors for this Court must
13 consider in appointing a guardian and conservator.

14 The first two factors are the limitations of
15 the respondent and the development of the respondent's
16 maximum self-reliance and independence.

17 I think there's no dispute in this case,
18 there's been no evidence today that Ms. Adams has the
19 capacity to make decisions for herself. Dr. Betzelos
20 testified that to a reasonable degree of medical
21 certainty she has not, and Ms. Bell has been acting as
22 her next of kin or power of attorney because she cannot

1 make those decisions. So the first two factors at least
2 weigh in favor of appointing a guardian and conservator.

3 The third factor; the availability of less
4 restrictive alternatives including powers of attorney and
5 advanced medical directives.

6 Your Honor, this is what's been in place. Ms.
7 Bell has been acting as power of attorney, and for the
8 last 50 days she been unable or unwilling, for whatever
9 reason, to facilitate a transfer of Ms. Adams to an
10 appropriate facility. There's no evidence before this
11 Court that Ms. Adams is not stable and right for
12 discharge.

13 The only medical testimony Your Honor heard
14 today was from Dr. Betzelos that testified that every
15 department within INOVA Hospital, Cardiology, Pulmonary,
16 all of them have concluded since December 28, 2016, Ms.
17 Adams is ready for discharge.

18 A less restrictive alternative like a power of
19 attorney or advanced medical directive has simply not
20 been working in this case. And at least at this time,
21 maybe it is for a certain during, but at least at this
22 time I think there are no less restrictive alternatives

1 than a guardian I think further who can make decisions
2 for Ms. Adams.

3 The forth factor is the extent to which is
4 necessary to protect respondent from neglect,
5 exploitation and abuse. I think that factor supports a
6 guardian, I'm not sure it dictates who should serve. So
7 that brings us to the last three factors.

8 THE COURT: I'm sorry, Counsel, I didn't
9 understand that point. There's no allegation of abuse,
10 exploitation or neglect, right?

11 MS. KIRKLAND: Correct, that was my point. I
12 think the forth factor weighs in favor of appointing
13 someone, but it doesn't dictate who should serve, because
14 there is no evidence that either the sister or anyone
15 else has abused Ms. Adams. I think she is well cared for
16 by everyone. So I'm not really sure if that factor helps
17 much, but it has to be considered.

18 THE COURT: Okay.

19 MS. KIRKLAND: The lasting factors weigh
20 heavily, not only in appointing a guardian and
21 conservator, but also in favor of appointing
22 professionals like Mr. Labowitz and Ms. Heishman, who are

1 willing to serve for Ms. Adams in this capacity.

2 The fifth factor for instance is the actions
3 needed to be taken by a a guardian or a conservator. And
4 that's the very issue in this case.

5 The evidence is Ms. Adams has been ready for
6 discharge since December, and she remains in the
7 hospital. She is not required that level of care, and
8 she's in a hospital that Dr. Betzelos testified is at a
9 95-percent capacity, and it has its own duty to the
10 public to ensure that its beds are available for patients
11 who actually need acute medical care.

12 There's a case out of the District Court in
13 D.C. (unintelligible) versus Beacom, (PH) where the Court
14 said a hospital has a moral duty to reserve its
15 accommodations for persons who need medical and hospital
16 care, and it would be a deviation from its purposes to
17 act as a nursing home for persons who need nursing care.
18 The action required in this case is that Ms. Adams needs
19 nursing care, not acute-level care.

20 I think the evidence supports the only
21 professional guardians we proposed would be willing to
22 make that decision and facilitate a plan today.

1 Ms. Bell, even sitting here today, knowing that
2 this case is here, has no plan and has made no effort to
3 go to the social worker and case manager at INOVA, pick a
4 place that is available today and make that decision.
5 It's something that changes daily, so she can't wait to
6 get a message and call back a few days later. Doing that
7 in that circular process, as Ms. Hall testified, the bed
8 will never be available. She will just remain in the
9 hospital as she has for the last 50 days.

10 The sixth factor is similar. It's the
11 suitability of the proposed guardians and conservators.
12 Ms. Bell has been the one that's been making the
13 decisions, and it's not working. Mr. Labowitz testified
14 that he and his partner, Ms. Heishman would consider her
15 interests and her preferences, as well as those of Ms.
16 Adams to the extent they're numb.

17 He has plenty of experience. He said he
18 represented maybe a 1000, or he served as guardian and
19 conservator for maybe 1000 persons in the northern
20 Virginia area. He's familiar with the facilities. He
21 testified that there are some he would not send anyone
22 to. He's not willing to just discharge her anywhere, he

1 is thoughtful, careful, and he will be held to a
2 fiduciary standard under the Code, which he will owe to
3 Ms. Adams to ensure that any decisions made in her best
4 interests.

5 And that brings us to the seventh factor, which
6 is the best interests of Ms. Adams as the respondent.

7 As this Court has heard from Ms. Hall and also
8 Mr. Labowitz, a professional guardian could facilitate
9 locating an appropriate placement for Ms. Adams at this
10 time.

11 Additionally, the evidence from Ms. Bell, she
12 transferred Ms. Adams to Fairfax Hospital against medical
13 advice, and now with medical advice saying to please
14 transfer her, she doesn't do it. She testified, the
15 quote I wrote down was, "I question everything a doctor
16 tells me now." And while some level of questioning is
17 healthy and probably in Ms. Adams' bests interests,
18 questioning every little thing to the point where it
19 paralyzes her and makes her unable to make a decision, is
20 not in Ms. Adams' best interests.

21 As stated by the GAL in her report, Ms. Adams
22 does not need to be in the hospital where she is in a

1 greater risk of infection.

2 In order to achieve the desired goal of
3 discharging her a home, a next step is placement in a
4 skilled nursing facility. So consistent with the
5 recommendation of the GAL, INOVA would ask this Court to
6 appoint Mr. Labowitz and Ms. Heishman as the guardians
7 and conservators.

8 At least for the time now, if the Court wanted
9 to set the matter out on the docket a few weeks for
10 review after she's been discharged and placed to see if
11 it still makes sense to proceed, INOVA would have no
12 objection to putting some type of restraint or duration
13 on it, at least for review. But at this time standing
14 here today, I think the only option is to appoint Mr.
15 Labowitz and Ms. Heishman as the guardian and
16 conservator.

17 THE COURT: Why a conservatorship?

18 MS. KIRKLAND: Your Honor, the conservatorship
19 -- perhaps I should have had Mr. Labowitz elaborate. In
20 order to place her, they will need to have Medicare in
21 place to pay for it or fund it. And so in order for them
22 to facilitate the placement after discharge, they will

1 need access to her financial through Medicare, her
2 Medicaid; be able to get the appropriate waivers needed
3 that she's to go home eventually. She will need -- it's
4 called an EDC waiver to get staff in a home. So in order
5 to facilitate these transfers and discharges, they'll
6 need access to her -- whether it's benefits through
7 Medicare, Medicaid, or her finances to the extent she has
8 any means.

9 THE COURT: Okay. Well, that will be a
10 question for the guardian ad litem in that closing.

11 MS. KIRKLAND: Thank you, Your Honor.

12 THE COURT: Okay. Thank you very much.

13 Let's go with the closing with the intervenor
14 before we go with the GAL.

15 MS. MORISI: Thank you, Your Honor.

16 Well, Your Honor, you have a very difficult
17 decision. Before you is a question that could put a
18 stranger in charge of Ms. Adams.

19 You heard from my client, she's a walking
20 encyclopedia of her sister's needs. This isn't just a
21 familiar duty. This is a complete love and respect for
22 her sister. She understands her sister's needs, her

1 pains, her joys. She's always acting in her sister's
2 best interest. This condition is not just something that
3 happened in November, December or January. This is been
4 an on-going issue that she has been involved with. And
5 as I say, she's always acting in the best interests of
6 her sister.

7 Declining the discharge, when presented to her
8 in January, she felt was in her sister's best interests
9 that further care was needed. And then being kept from
10 the medical information that actually was needed for her
11 to continue making decisions, was further detrimental to
12 her sister's care.

13 They denied Ms. Bell the ability to be her
14 sister's advocate, and now they criticize her for not
15 being an advocate and not making decisions.

16 Your Honor, if you determine that guardianship
17 is necessary, I ask that you consider Ms. Bell.
18 Alternatively, if you determine that a neutral guardian
19 should be appointed, that you please make them co-
20 guardian of Ms. Bell, and protect her rights to
21 participate in her sister's medical care decisions and
22 living arrangements. And that you limit the duration of

1 any guardianship to that which is necessary to effectuate
2 a safe discharge from INOVA.

3 Ms. Bell is not necessarily disagreeable to a
4 skilled nursing facility, but she feels home is the best
5 place for her sister, and in the past her sister has been
6 discharged directly to home.

7 What she needs from case managers is assistance
8 in getting the home ready for her sister to be received.
9 That EDC waiver that my colleague mentioned, the
10 percussion equipment, possibly oxygen if that's required
11 or considered necessary, the prescriptions, et cetera,
12 and the nursing staff that's needed.

13 But that's what my client would like. That's
14 her plan for her sister, for her to be home.

15 Thank you.

16 THE COURT: Thank you.

17 Closing argument of the guardian ad litem.

18 MS. JOHNSTON: Thank you, Your Honor.

19 Ideally Ms. Bell could continue to serve as her
20 power of attorney for her sister, Ms. Adams. And that
21 has been in the works for the past couple of months, and
22 all the meetings and negotiations. But really all that

1 requires her to continue to serve and act in her sister's
2 best interests was to agree to a discharge.

3 I still want Ms. Bell to take care of her
4 sister, but we've come to essentially a loop that we
5 can't seem to get out of.

6 And so what I'm hoping is that having the
7 professional guardians and conservators step in and get
8 us off this loop. That the ultimate goal will be that
9 Ms. Bell can step back in as her role, and that the power
10 of attorneys step in and then become unsuspended, and
11 that she's been able to make medical decisions and care
12 for her sister.

13 Because she does clearly love and care for her
14 sister, that she just seems to be unable to make the
15 decisions required for her sister to be discharged,
16 probably for a number of reasons.

17 You heard a great amount of distrust that had
18 become familiar over the years for the medical community.
19 And when you are caring for someone that you love, and
20 you think people have ulterior motives, and that they've
21 made mistakes, it's probably natural to distrust. But
22 that distrust has risen to the level we can't move

1 forward for Ms. Adams' care, and can't move forward to
2 get her back home so that they can live together again.

3 So it would be my recommendation for the
4 guardianship and conservatorship to be entered with the
5 hope that it's temporary, and that Ms. Bell can return to
6 her care-taking role.

7 THE COURT: Why are you recommending a bond for
8 the conservatorship of \$30,000 with Surety?

9 MS. JOHNSTON: So that if a Surety Bond is
10 deemed to be necessary. I don't think that a Surety Bond
11 is really necessary. It seems like the Commissioner of
12 Accounts prefers a Surety Bond.

13 THE COURT: It's usually one-third of the
14 assets of the estate.

15 MS. JOHNSTON: Right, but that premium amount,
16 that's the smallest premium amount before it goes up, so
17 it doesn't matter if it's one dollar or if she has one
18 dollar or \$30,000, that would be the new bond amount. So
19 it could be anything under that. We just don't -- she's
20 indigent.

21 THE COURT: That's what I needed to know.

22 MS. JOHNSTON: Yes, yes. So she -- to my

1 understanding, she does not have separate funds other
2 than disability, and from my understanding as well that
3 Ms. Bell has been serving as her representative, payee,
4 so they haven't needed a conservator thus far. But she's
5 been able to serve in that role, but in terms of the need
6 for the attorneys to have, at least to begin the
7 conservatorship, it will make it easier to get the
8 services in place for Medicaid.

9 A lot of times with these cases when we're not
10 entirely sure how much money or if the person is
11 indigent, that a conservatorship usually gets dropped
12 within a month or so if it's no longer needed.

13 THE COURT: Is that through Commissioner Russ?

14 MS. JOHNSTON: Yes, so what will happen would
15 be that Mr. Labowitz or Ms. Heishman would file a motion
16 to either reduce the bond amount or just close the
17 conservatorship if it's not necessary. It probably won't
18 be necessary long after they do what they needed to do,
19 and it would revert back to Ms. Adams' funds being
20 managed again by her sister.

21 THE COURT: Okay. Thank you, counsel.

22 MS. JOHNSTON: Thank you.

1 THE COURT: All right, the petitioner, the
2 moving party gets the final argument since it's your
3 burden.

4 MS. KIRKLAND: I have nothing further, Your
5 Honor.

6 THE COURT: Okay.

7 So with regard to the petition to appoint a
8 guardian and a conservator, the Court's analysis is
9 driven by statute. The General Assembly has made it
10 clear that Judges are to consider certain statutory
11 factors.

12 So what I need to do is look at the evidence
13 that was presented in this case, assess the witness
14 testimony and exhibits and apply the relevant facts into
15 the legal factors that the Court requires consideration
16 of, so let me work through this analysis. In particular
17 I am referring to Virginia Code Section 64.2-2007,
18 Subsection (c).

19 The first thing the Court needs to do is look
20 at the limitations of Ms. Adams. It's very clear that
21 she does not have the capacity to care for herself in
22 large part due to the accidental overdose that occurred

1 several years ago.

2 With regard to the second factor; the
3 development of the respondent's maximum self-reliance and
4 independence. I have no evidence before me that Ms.
5 Adams will ever become self-sufficient, and that's
6 through the testimony of the doctors and also Ms. Bell's
7 testimony.

8 With regard to number three; the availability
9 of less restrictive alternatives, including advanced
10 directives and durable powers of attorney.

11 Ms. Adams' sister has had such powers today,
12 and whatever power she has does not seem to be resolving
13 the situation; namely, that we have six specialists at
14 INOVA, who for almost two months have said that Ms. Adams
15 is clear for discharge, and just cannot get the person
16 with the power of attorney and advanced medical
17 directives to agree.

18 The testimony of the medical professionals is
19 that the argument, the conversations are now circular, so
20 there's no end in point as far as the hospital is
21 concerned, and that is simply not viable.

22 Number four; the extent to which is necessary

1 to protect the respondent from neglect, exploitation or
2 abuse. There is no indication of neglect, exploitation
3 or abuse.

4 What the Court sees is that Ms. Adams is
5 blessed to have a sister who loves her and cares for her,
6 and I don't sense that the petitioner has engaged in any
7 neglect, exploitation or abuse either. They're just
8 dealing with a situation where a medical professional
9 believes that somebody is ready for discharge from the
10 Trauma One Treatment Center, and that's not being
11 facilitated by the person with the power of attorney.

12 Number five; the actions needed to be taken by
13 the guardian or the conservator if one is appointed.

14 Well, the guardian will have to identify a
15 suitable facility that is referred to as a skilled
16 nursing-care facility, that could meet Ms. Adams'
17 current, and at least for the short term, future needs.

18 The conservator would be necessary because
19 Medicare becomes involved. So somebody with the ability
20 to make some financial decisions, is going to have to be
21 involved when interacting with Medicare in order to find
22 an appropriate facility.

1 And then we have the suitability of the
2 proposed guardian or conservator. We have a couple of
3 options here. Mr. Labowitz and Ms. Heishman have
4 extensive experience for serving as GALs and conservators
5 for almost 25 years, almost. They've exclusively been
6 doing this, and they are well respected in the area for
7 caring for the people who they are appointed to care for.

8 With regard to Ms. Bell, as I indicated she
9 loves her sister very much, but I don't believe the
10 decision she's been making when it comes to the discharge
11 has been in her sister's best interest. So I don't
12 believe she is an appropriate person to serve as a
13 guardian or a conservator.

14 In terms of the best interests of Ms. Adams,
15 the Court looks at all the evidence presented, and it is
16 clear to the Court that Mr. Labowitz and Ms. Heishman are
17 the suitable people to serve as guardian and conservators
18 for Ms. Adams to get her discharged from INOVA, and find
19 a skilled nursing facility where she can be cared for
20 until she is able to convalesce to the point where she
21 can go be with her family.

22 So the Court does grant the petition of INOVA

1 Healthcare Services to appoint Mr. Labowitz and Ms.
2 Heishman the guardian and conservator for Anastasia
3 Adams.

4 The Court is going to require a \$1,000 without
5 Surety for guardianship and \$30,000 with Surety for the
6 conservatorship.

7 Are there any questions of anyone?

8 MS. KIRKLAND: Your Honor, the only other thing
9 I would note is that the petitioner is required to accept
10 and bear the costs, and INOVA has agreed to pay Ms.
11 Johnston's GAL fees. We will include that in the order.
12 I'd like to show you the invoice, we might need you to --

13 THE COURT: Final.

14 MS. KIRKLAND: -- agree also that it's okay
15 with you.

16 THE COURT: All right. Is there any objection
17 to the amount that the GAL is asking for?

18 MS. KIRKLAND: Not by INOVA, and we've agreed
19 to pay it.

20 THE COURT: All right.

21 MS. KIRKLAND: Your Honor, just for your
22 reference, that amount is just over \$5,000 for her

1 services. So that's fine.

2 THE COURT: All right.

3 MS. KIRKLAND: So we'll just put that in the
4 order.

5 THE COURT: That's fine, and you prepared an
6 order I'm assuming, counsel?

7 MS. KIRKLAND: I have, Your Honor. Conferring
8 with Ms. Morisi in looking at it this morning, we made
9 full marks on it, but I just wanted to make sure it's --

10 THE COURT: I'll step out into the hallway, so
11 you all could confirm it.

12 MS. KIRKLAND: If you could give us a few
13 minutes, there's a lot that the statute requires. I just
14 want to make sure we got it right.

15 THE COURT: All right. I'll be waiting
16 outside.

17 MS. KIRKLAND: Thank you.

18 (Whereupon, at approximately 12:51 p.m., the hearing
19 in this matter was concluded.)

CERTIFICATE OF COURT REPORTER

I, JoAnne B. Dellosso, do hereby certify that the transcript of the foregoing proceedings was taken by me by voice writing and thereafter reduced to typewriting under my supervision; that said transcript is a true record of the proceedings; that I am neither counsel for, related to, nor employed by any of the parties to the action in which these proceedings were taken; and further, that I am not a relative or employee of any attorney or counsel employed by the parties thereto, nor financially or otherwise interested in the outcome of the action.

JoAnne B. Dellosso
Court Reporter

Department of Health and Human Services
OFFICE OF MEDICARE HEARINGS AND APPEALS
Cleveland Field Office
Cleveland, Ohio

Appeal of:	A. Adams	ALJ Appeal No.:	1-5782988247
Beneficiary:	A. Adams		Medicare Part A
HICN:	*****4472A	Before:	Thomas S. Tyler U.S. Administrative Law Judge

DECISION

After carefully considering the evidence and arguments presented in the record and at hearing, a **FAVORABLE** decision is entered for the Appellant.

PROCEDURAL HISTORY

The Beneficiary was admitted as an inpatient at Inova Fairfax Hospital (the Provider). The Provider stated that it notified the Beneficiary of its decision to terminate inpatient services and the Beneficiary appealed. KEPRO, a Family Centered Care Quality Improvement Organization (BFCC-QIO), stated in its determination letter dated December 30, 2016, that the Beneficiary was notified by telephone on December 30, 2016 at 4:09:23 PM that the decision to terminate services was upheld and Medicare would no longer cover those services beginning on December 31, 2016 at 12 noon. KEPRO also stated that it informed the Beneficiary that she was responsible for services continued at the Provider's facility beginning on December 31, 2016, except for those services covered by Medicare Part B. The Beneficiary requested that KEPRO reconsider its previous decision. A KEPRO physician who was not involved in the initial determination conducted another review of the medical information. On January 2, 2017 KEPRO issued a reconsideration, upholding its original decision that a continued stay in the hospital was not medically necessary and would not be covered. (Ex. 2).

An appeal and request for an Administrative Law Judge (ALJ) Hearing, pursuant to 42 C.F.R. § 405.1002(a), was timely filed by the Appellant on behalf of the Beneficiary and received by the Cleveland, Ohio, Office of Medicare Hearings and Appeals (OMHA). The amount in controversy meets the jurisdictional requirements for a hearing at OMHA.

The undersigned ALJ held a telephone hearing on February 28, 2017 at 3:00 PM. Yolanda Bell, the Beneficiary's sister and power of attorney, appeared and testified on the Beneficiary's behalf.

The Medicare contractors were advised of the date and time of the hearing but the QIC did not respond and KEPRO waived its right to be present. The witness was sworn according to law and waived the right to an attorney.

The case was decided pursuant to the Administrative Procedure Act (5 U.S.C. § 551 et. seq.), Title XVIII of the Social Security Act (Act), and implementing regulations and policy. All exhibits have been admitted into the record, without objection, and have been fully considered in reaching the decision herein.

ISSUES

The decisions below concluded that the Beneficiary's inpatient care was appropriately terminated. The Appellant claims the Beneficiary continued to require an inpatient acute hospital level of care after December 30, 2016. The issue on appeal is whether the Provider properly terminated the Beneficiary's inpatient services.

FINDINGS OF FACT

The Beneficiary in this case is a 59 year-old woman who suffers from an anoxic brain injury, bronchiectasis, gastroesophageal reflux disease, anxiety, dysphagia, contractures and had a PEG tube. She was admitted to the provider's facility from a skilled nursing facility (SNF) due to cough, fevers, chills and extensive bibasilar pneumonia with aspiration. She completed antibiotic treatment on December 11, 2016. (Ex. 2, p. 12, 81).

On December 22, 2016 an echo of the Beneficiary's pericardium revealed a large pericardial effusion circumferential to the heart. This is an abnormal amount of fluid between the heart and the pericardium (the sac surrounding the heart). There was significant variation in the mitral inflow, however no other evidence of hemodynamic compromise was noted. (*Id. at p. 41*).

The Beneficiary had recurrent fevers and worsening infiltrates in her lungs as seen on a chest x-ray. She was started on a second course of antibiotics for pneumonia on December 25, 2016. (*Id. at p. 12*).

The progress noted of December 26, 2016 noted that the Beneficiary was moaning and agitated without being consoled. She was incontinent of bladder and bowel and cleaned and changed. She was coughing up whitish sputum so her mouth was suctioned and oral care was provided. A healing ulcer was noted on her buttock and balsam peru-caster was applied and covered with a foam barrier adhesive. She was fed through her tube. (*Id. at p. 31*). A progress note from that date indicates the Beneficiary had recurrent fevers and worsening infiltrate on a chest x-ray. (*Id. at p. 25*).

On December 27, 2016, the Beneficiary was noted to have a productive cough and moderate amount of thick white sputum that required suctioning. She remained on continuous tube feeding with water flushes every 3 hours. (*Id. at p. 35*). A pulmonary medicine progress report on December 27, 2016 lists 19 "patient active problems" including aspiration pneumonia, sepsis,

normocytic anemia, leukocytosis, pneumonia, abnormal EEG, seizure and dyspnea. (Ex. 2, p. 36).

On December 28, 2016, the Appellant's family noticed that the tube feeding liquid was too thick and it clogged the line. She reported it to the nurse and the tube had to be replaced with a new one. (*Id. at p. 52*). Also on that date, the Appellant was informed by the social worker that the physician had written the discharge order and there were attempts made by the social worker to find a skilled nursing facility to her to be transferred. (*Id. at p. 66*).

On December 29, 2016, the Beneficiary was noted to be more congested in the morning. Her oxygen saturation was 88% on room air but went up to 92-93% after a large amount of white thin secretions were suctioned. (*Id. at p. 68*).

Ms. Bell appeared at hearing and advocated strongly and passionately for her sister. She reiterated the history of her sister's illnesses leading up to her transfer to the Provider's facility. She stated that her sister had multiple bouts of pneumonia and was unable to speak or eat and had to be placed on a feeding tube. Ms. Bell urged that her sister was not medically stable at the time of transfer and required continued inpatient care through February 17, 2017, when she was able to be transferred to a lower level of care. In addition, she stated that at the time of her discharge, her sister was still being treated for pneumonia which included the production of sputum that had to be suctioned in order for the Beneficiary to breath properly. Further, Ms. Bell argued that her sister's other medical conditions required continued inpatient care. She noted that a large circumferential pericardial effusion was discovered; she suffered from a 12 inch deep vein thrombosis with a clot; she had acute anaerobic fungal blood infection, the source of which had not yet been determined and she suffered from acute malnutrition. (Ex. 3, p. 1; *Hearing CD*). Given her sister's multiple acute illnesses, she maintained that she needed to be closely monitored in an inpatient hospital setting. (*Hearing CD*).

LEGAL FRAMEWORK

I. ALJ Review Authority

A. Jurisdiction

An individual who, or an organization that, is dissatisfied with the reconsideration of an initial determination is entitled to a hearing before the Secretary of the Department of Health and Human Services (HHS), provided there is a sufficient amount in controversy and a request for hearing is filed in a timely manner. (§ 1869(b)(1)(A) of the Act).

In implementing this statutory directive, the Secretary has delegated authority to administer the nationwide hearings and appeals system for the Medicare program to OMHA. (*See* 70 Fed. Reg. 36386, 36387 (June 23, 2005), as amended by 76 Fed. Reg. 19995 (August 8, 2011)). The ALJs within OMHA issue the final decisions of the Secretary, except for decisions reviewed by the Medicare Appeals Council. (*Id.*)

The request for hearing is timely if filed within sixty (60) days after receipt of a QIC reconsideration decision. (See 42 C.F.R. § 405.1014(b)(1)). These appeals are before the ALJ on a timely request for hearing. The amounts in controversy meet the jurisdictional requirements for an ALJ hearing before OMHA. (42 C.F.R. § 405.1006; 76 Fed. Reg. 59138 (July 4, 2011)).

B. Scope of Review

All initial determinations for Center for Medicare and Medicaid Services' (CMS) contractors, subsequent to January 1, 2006, and all cases subject to a QIC reconsideration, are governed by the ALJ hearing procedures set forth at 42 C.F.R. §§ 405.900 through 405.1064. (See 70 Fed. Reg. 11420, 11424-26 (Mar. 8, 2005), as amended by 70 Fed. Reg. 37700 (June 30, 2005), 70 Fed. Reg. 50214 (August 26, 2005), and 74 Fed. Reg. 65296 (December 9, 2009)) pursuant to the CMS implementation policy for the Medicare, Medicaid, SCHIP Benefits Improvement and Protection Act of 2000 (BIPA), Pub. Law 106-554, app. F, 114 Stat. 2763, 2763A-463, and the Medicare Prescription Drug, Improvement, and Modernization Act of 2003 (MMA), Pub. Law 108-173, 117 Stat. 2066.

The issues before the ALJ include all the issues brought out in the initial, reconsidered, or revised determination that were not decided entirely in the Appellant's favor. However, if evidence presented before or during the hearing causes the ALJ to question a fully favorable decision he or she will notify the Appellant and will consider it an issue at the hearing. (42 C.F.R. § 405.1032(b)).

The ALJ may decide a case on the record and not conduct an oral hearing if the Appellant and all the parties indicate in writing that they do not wish to appear before the ALJ at an oral hearing or the evidence in the hearing record supports a finding in favor of the Appellant on every issue. (42 C.F.R. § 405.1038).

C. Standard of Review

"The ALJ conducts a de novo review and issues a decision based on the hearing record." (42 C.F.R. § 405.1000(d)).

II. Principles of Law

A. Statutes and Regulations

The Medicare program, Title XVIII of the Act, is administered through CMS, a component of HHS. Under the authority of §1842(a) of the Act, the Secretary of HHS is authorized to enter into contracts with private entities for the daily operations of the program.

Medicare Part A entitles a beneficiary to reimbursement for a variety of costs associated with hospital, related post-hospital, home health services, and hospice care for individuals eligible for Medicare. (42 U.S.C. § 1395d (a) (1)). Payment by Medicare is limited by § 1862(a) of the Act which states, in pertinent part: "Notwithstanding any other provision of this title, no payment may be made under Part A or Part B for any expenses incurred for items or Services – (1) (A)

which, ...are not reasonable and necessary for the diagnosis or treatment of illness or injury or to improve the functioning of a malformed body member. . ." (42 U.S.C. § 1395y(a)(1)(A); see also 42 C.F.R. § 411.15(k)(1)).

Section 1833(e) of the Act states that "[n]o payment shall be made to any provider of services or other person under this part unless there has been furnished such information as may be necessary in order to determine the amounts due such provider or other person under this part for the period with respect to which the amounts are being paid or for any prior period." (42 U.S.C. § 13951(e)).

Section 1871(a)(2) of the Act provides that no rule, requirement or statement of policy, other than a National Coverage Determination (NCD), can establish or change a substantive legal standard governing the scope of benefits or payment for services under the Medicare program unless it is promulgated as a regulation by CMS. However, although not subject to the force and effect of the law, CMS and its contractors, have issued policy and guidelines that describe criteria for coverage for selected types of medical services and supplies.

Section 1879(a) of the Act provides that if the services provided are deemed to be not reasonable and necessary for the diagnosis and treatment of an illness or injury or to improve the functioning of a malformed body member or are deemed to be custodial, payment may still be made if both the Beneficiary and the Provider of the services did not know, nor reasonably should have been expected to know, that the services would not be reimbursable by Medicare. If no payment may be made under this section, the Beneficiary's liability for the charges incurred may be waived if the Beneficiary did not know, nor reasonably should have been expected to know, that the services would not be reimbursable by Medicare. (§ 1879(b)). Medicare reimbursement under § 1879 cannot be made when Medicare coverage is denied for any basis other than under the provision of § 1862(a)(1). (§ 1879(a)(1)).

CMS regulations consider a provider or supplier to have known that items or services would not be covered by Medicare if they are given direct notice of this by CMS or any of its agents, including intermediaries and carriers, by utilization review committees, or by the beneficiary's attending physician. (See 42 C.F.R. § 411.406(b) and (c)). A provider or supplier is also considered to have notice that services are not covered if it is clear that they should have known of Medicare's coverage criteria based on the receipt of notices from CMS or its agents, publication in the Federal Register, or based on their "knowledge of what are considered acceptable standards of practice by the local medical community." (42 C.F.R. § 411.406(e)). According to the Medicare Program Integrity Manual (MPIM), the supplier is liable for the amount where the patient's medical record does not support medical necessity for the item, unless a properly executed Advance Beneficiary Notice has been obtained. (MPIM, Pub. 100-08, Ch. 5, § 5.2.1).

B. Policy and Guidance

Administrative Law Judges may also give consideration to the manuals and rulings issued by the CMS in determining benefit coverage and eligibility. Although not binding on the

Administrative Law Judge, the respective manuals provide guidance in the administration of the Medicare program. (*Shalala v. Guernsey Memorial Hospital*, 514 U.S. 87 (1995)).

The Medicare Benefit Policy Manual (MBPM) gives guidance regarding coverage requirements in a skilled nursing facility setting. The Medicare Benefit Policy Manual ("MBPM"), CMS Publication 100-2, Chapter 8, CMS further incorporates the coverage requirements, as follows:

- The patient requires skilled nursing services or skilled rehabilitation services, i.e., services that must be performed by or under the supervision of professional or technical personnel *See* §§ 30.2 - 30.4; are ordered by a physician and the services are rendered for a condition for which the patient received inpatient hospital services or for a condition that arose while receiving care in a SNF for a condition for which he received inpatient hospital services.
- The patient requires these skilled services on a daily basis *See* § 30.6; and as a practical matter, considering economy and efficiency, the daily skilled services can be provided only on an inpatient basis in a SNF. *See* § 30.7.
- The services must be reasonable and necessary for the treatment of a patient's illness or injury, i.e., be consistent with the nature and severity of the individual's illness or injury, the individual's particular medical needs, and accepted standards of medical practice. The services must also be reasonable in terms of duration and quantity." *Id.* at § 30.

CMS further instructs that if any one of these four factors is not met, a stay in a SNF, even though it might include the delivery of some skilled services, is not covered. *Id.* When reviewing SNF services to determine whether the level of care requirements is met, CMS suggests that contractors first determine whether a patient needs skilled care. *Id.* "The intermediary considers the nature of the service and the skills required for safe and effective delivery of that service in deciding whether a service is a skilled service." *Id.* at § 30.2.2.

Sections 1154, 1866(a)(1)(F) and 1886(f)(2) of the Act require that a Quality Improvement Organization (QIO) review services furnished by physicians, other health care professionals, providers and suppliers as specified in its contract with the Secretary of HHS to determine compliance with Medicare law and policy. CMS instructs that under Part A of Medicare, the QIO for each hospital is responsible for deciding, during review of inpatient admissions on a case-by-case basis, whether the admission was medically necessary. Medicare law authorizes the QIO to make these judgments, and the judgments are binding for purposes of Medicare coverage. *Id.* Medicare regulations set forth at 42 C.F.R. § 476.100 require that, in assessing the need for and appropriateness of an inpatient health care facility stay, a QIO must apply criteria to determine the appropriateness of providing services at a particular health care facility or at a particular level of care.

CMS provides guidance for the QIO to apply when it conducts a review of admissions and discharges as specified in 42 C.F.R. § 476.71(a)(6). This guidance is contained in the Medicare Quality Improvement Organizations Manual (MQIOM) (Internet-Only Manual Publ'n 100-10), ch 4, § 4110 (Rev. 2, 07-11-03), in relevant part as follows:

QIOs must conduct review of admissions and discharges as specified in 42 C.F.R. 476.71(a)(6). Review of the medical record must indicate that inpatient hospital care was medically necessary, reasonable, and appropriate for the diagnosis and condition of the patient at any time during the stay. The patient must demonstrate signs and/or symptoms severe enough to warrant the need for medical care and must receive services of such intensity that they can be furnished safely and effectively only on an inpatient basis.

A. Determining Medical Necessity and Appropriateness of Admission/Discharge -- Review the medical record and use appropriate criteria to determine if an admission to a PPS or non-PPS hospital should be referred for physician review. Similarly, use criteria to identify, for physician review, cases of potential premature discharge (i.e., the patient was not medically stable and/or discharge was not consistent with the patient's need for continued acute inpatient hospital care) (See §4510 on screening criteria).

The case is referred to a physician reviewer when the non-physician reviewer cannot approve the hospitalization as necessary and/or another level of care would have been appropriate without posing a threat to the safety or health of the patient.

The physician reviewer must consider, in his/her review of the medical record, any preexisting medical problems or extenuating circumstances that make admission of the patient medically necessary. Factors that may result in an inconvenience to a patient or family do not, by themselves, justify inpatient admission. When such factors affect the patient's health, consider them in determining whether inpatient hospitalization was appropriate.

Inpatient care rather than outpatient care is required only if the patient's medical condition, safety, or health would be significantly and directly threatened if care was provided in a less intensive setting. Without accompanying medical conditions, factors that may cause the patient inconvenience in terms of time and money needed to care for the patient at home or for travel to a physician's office, or that may cause the patient to worry, do not justify a continued hospital stay or justify your approval of a higher-than- necessary level of care.

Certain services are considered regulatory examples of skilled services and those include; 1.) overall management and evaluation of a care plan; 2.) observation and assessment of an unstable patient's changing condition; 3.) Levin tube and gastrostomy feedings; 4.) ongoing assessment of rehabilitation needs and potential; 4.) therapeutic exercises and activities provided by a skilled therapist; 5.) gait evaluation and training; and 6.) intravenous or intramuscular injections and intravenous feedings. 42 C.F.R. §409.33.

Medicare laws state that if a hospital concludes that inpatient services will no longer be covered by Medicare, the hospital is required to issue the Beneficiary an Advanced Beneficiary Notice (ABN). The purpose of an ABN is to inform a Medicare beneficiary, before he or she receives

specified items of services, that Medicare certainly or probably will not pay for the items or series in that particular instance. The ABN allows the beneficiary to make an informed decision whether to receive the items or services for which he or she may ultimately be financially liable. (Medicare Claims Processing Manual, Pub. 100-4, Ch. 30, §§ 10, 50.1)

To be acceptable, the ABN must give the beneficiary a reasonable idea of why the service provider is predicting the likelihood of Medicare denial so that the beneficiary can make an informed consumer decision whether to receive the service and pay for it personally. (*Id.* at §§ 40.3, 40.3.8)

An ABN must meet certain standards to be acceptable as evidence of the beneficiary's knowledge for the purposes of liability. To be acceptable, the ABN must be in writing, in the CMS-approved format, use approved notice language, ensure readability to facilitate the beneficiary's understanding, cite the particular service or services for which payment is likely to be denied and cite the service provider's reasons for believing Medicare payment will be denied. (42 C.F.R. § 411.408(f)(1)).

ANALYSIS

The QIO concluded that the Appellant's discharge from an acute hospital setting was appropriate because it determined that she was medically stable and there was no plan for evaluation or treatment that required a continued hospital stay. The Appellant claims that the Beneficiary's needs required continued inpatient hospital services beyond December 30, 2016 and up to February 17, 2017.

Medicare sets forth the conditions for placing or maintaining a patient in an inpatient setting. "Review of the medical record must indicate that inpatient hospital care was medically necessary, reasonable, and appropriate for the diagnosis and condition of the patient at any time during the stay. The patient must demonstrate signs and/or symptoms severe enough to warrant the need for medical care and must receive services of such intensity that they can be furnished safely and effectively only on an inpatient basis." The Medicare rules go further to state that "[i]npatient care rather than outpatient care is required only if the patient's medical condition, safety, or health would be significantly and directly threatened if care was provided in a less intensive setting." The beneficiary must have qualifying medical conditions. "Without accompanying medical conditions, factors that may cause the patient inconvenience in terms of time and money needed to care for the patient at home or for travel to a physician's office, or that may cause the patient to worry, do not justify a continued hospital stay or...a higher-than-necessary level of care." Medicare Quality Improvement Organizations Manual (MQIOM) (Internet-Only Manual Publ'n 100-10), ch 4, § 4110.

In addition, Medicare rules state that if a hospital determines that inpatient services will no longer be covered by Medicare, the hospital is to issue the Beneficiary an Advanced Beneficiary Notice (ABN). The purpose of an ABN is to inform a Medicare beneficiary, before he or she receives specified items of services, that Medicare certainly or probably will not pay for the items or services in that particular instance. The ABN allows the beneficiary to make an

informed decision whether to receive or decline the items or services for which he or she may be financially liable. (Medicare Claims Processing Manual, Pub. 100-4, Ch. 30, §§ 10, 50.1)

To be acceptable, the ABN must give the beneficiary a reasonable idea of why the service provider is predicting the likelihood of Medicare denial so that the beneficiary can make an informed consumer decision about whether he or she may agree to receive the service and potentially pay for it out of their own pocket. (*Id.* at §§ 40.3, 40.3.8) The ABN must be in writing, in the CMS-approved format and use approved notice language, ensure readability to facilitate the beneficiary's understanding, cite the particular service or services for which payment is likely to be denied and cite the notifier's reasons for believing Medicare payment will be denied. (42 C.F.R. §411.404; 411.408(f)(1)).

In this case, the evidence shows that the Beneficiary was transferred to the provider's facility from a skilled nursing facility and admitted as an inpatient on December 2, 2016 after being diagnosed with pneumonia. The Beneficiary's sister stated that the Beneficiary had already had pneumonia in November 2016 and was discharged from a previous hospital and became reinfected. (*Hearing CD*). The Beneficiary suffered from an anoxic brain injury caused by a Tylenol overdose as well as bronchiectasis, gastroesophageal reflux disease, anxiety, dysphagia, contractures and she was fed through a PEG tube. The Beneficiary was rarely verbal but could communicate at times. At the time of her hospitalization in December 2016, the Beneficiary was noted to be non-verbal and incontinent of bowel and bladder. There is no question that the Beneficiary required inpatient care at her admission. She was a very debilitated individual on a PEG tube with pneumonia.

The Beneficiary completed one course of antibiotics and seemed to be doing better. Discharge planning was initiated sometime in early to mid-December. However, on December 17, 2016, the discharge order was cancelled because the Beneficiary became medically unstable. (Ex. 2, p. 84). The medical notes indicate new recurrent fevers as of December 13, 2016 and worsening infiltrate seen on a chest x-ray. (*e.g., Id. at p. 20*).

The Beneficiary was started on a second course of antibiotics for pneumonia on December 25, 2016. The record documents frequent episodes in which the Beneficiary was coughing up whitish thick sputum that had to be suctioned out by the nurse. In fact, on one occasion she had so much sputum that it was affecting her oxygen saturation level. On December 29, 2016, the Beneficiary's oxygen saturation was 88% on room air. The oxygen saturation was raised to an acceptable 93% after the Beneficiary had the sputum suctioned. The record indicates the Beneficiary had atelectasis, or partial collapse, of the left lower lobe of her lungs as of December 27, 2016. (Ex. 2, p. 43). Furthermore, as noted by the Appellant the documents prior to discharge indicate the Beneficiary had a fungal infection of the blood of unknown origin, a recently diagnosed pericardial effusion and a 12 inch deep vein thrombosis.

The Beneficiary's sister was a passionate and effective advocate on her sister's behalf. She maintained that the Beneficiary required continued inpatient hospital care due to her pneumonia, inability to speak or eat, requirement for PEG feeding for all of her nutrition and other acute illnesses. We acknowledge that factors such as inconvenience or increased cost to a beneficiary or his or her family does not justify a continued inpatient hospital stay. The medical condition of

the Beneficiary must be such that the Beneficiary's health or life would be jeopardized in a less intensive setting.

After our review of the medical records, we agree with the claims of the Appellant. The record shows that the Beneficiary had multiple bouts of pneumonia and was unable to speak or eat. Additionally, she continued to require tube feedings in order to obtain all of her nutrition. The Beneficiary had a right ischial tuberosity (right sitting area) wound 1.2 x 2 cm that was treated with venelex and foam dressing. (Ex. 2, p. 24). The Beneficiary had not been able to sit in a wheelchair since her admission on December 2, 2016. The Beneficiary's sister noted that in the previous 12 years since her brain injury, the Beneficiary had never had a pressure sore. The Beneficiary also had a new diagnosis of a large pericardial effusion and a deep vein thrombosis. A pulmonary medicine progress report as of December 27, 2016 lists 19 "patient active problems" including aspiration pneumonia, sepsis, normocytic anemia, leukocytosis, pneumonia, abnormal EEG, seizure and dyspnea. (Ex. 2, p. 36). The Appellant's representative urged that her sister was not medically stable at the time of the discharge and required continued inpatient care. We cannot disagree. The Beneficiary was in a medically tenuous condition at the time the hospital intended to transfer the Beneficiary to a lower level of care. The Beneficiary had a new acute thrombosis in her upper extremity. She still had several significant acute illnesses, the most significant of which involved her pulmonary status. The Beneficiary had been treated with antibiotics beginning December 2, 2016 and continued to show an increase of infiltrates through December 17, 2016 despite aggressive efforts to stop it. Moreover, the Beneficiary had a propensity for recurrent infections and still had decreased breath sounds as of December 25, 2016. The Beneficiary's sister noted that the Beneficiary had two more instances of pneumonia since December 31, 2016. (Hearing CD). More germane to the present issue, though, two days before the proposed discharge, the Beneficiary had a decreased oxygen saturation level of 88% and the hospital needed to remove mucus from her lungs to increase her respiratory capacity. The Beneficiary also had ancillary issues, including a recently diagnosed pericardial effusion and fungal infection of her blood. Given the Beneficiary's dangerous respiratory status and unstable condition, as well as the other discovered issues, she had a significant risk of adverse consequences without the close monitoring and treatment that could only be provided in an inpatient hospital setting. The Beneficiary was not ready for discharge to a skilled nursing facility as of December 31, 2016.

Furthermore, we also note that the notice to the Beneficiary was not shown to be effective. The QIO maintained that the Beneficiary was advised via telephone of the hospital intent to terminate inpatient services, despite the fact that the Beneficiary is unable to speak. There is no documentation that such a telephone notice occurred. There is no summary of the telephone conversation in the record. Additionally, the hospital never furnished the Beneficiary or her representatives with written notice of its intent to cease the inpatient services. (Hearing CD). Pursuant to Medicare regulations, if a hospital determines that services will no longer be covered by Medicare, the hospital is to issue an advanced beneficiary notice (ABN) which must be in writing. There is no evidence in this record that the hospital issued an ABN in writing to the Appellant. The only written notice that is in the record from the hospital is a document titled "An Important Message From Medicare About Your Rights" and states "Patient sister is not at bedside 12/29" and "Patient nonverbal." The initials "MA" are next to this statement. (Ex. 2, p. 46). Otherwise, there are only the KEPRO documents in the file which find in favor of the

hospital's decision. (Ex. 1). Consequently, on this basis too, the Appellant received defective notice and was entitled to continued care as an inpatient.

Accordingly, the inpatient services after December 30, 2016 were medically reasonable and necessary and Medicare should have continued to cover any inpatient acute hospital level of care after that date until the Beneficiary stabilized and was able to be transferred to a lower level of care.

CONCLUSION OF LAW

The Beneficiary was entitled to continue to receive Medicare covered inpatient acute hospital level of care after December 30, 2016.

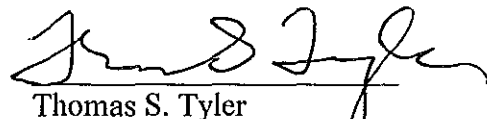

ORDER

The Medicare Contractor is **DIRECTED** to process this claim in accordance with this order.

Date: _____
