

January 23, 2024

The Honorable Michelle Lopes Moldonado, Chair  
House Committee on Labor and Commerce  
Subcommittee #1  
900 E Main St  
Richmond, VA 23219

Dear Chair Moldonado and Members of the House Labor and Commerce Subcommittee #1,

The Virginia Association of Hematologists and Oncologists (VAHO) and the Association for Clinical Oncology (ASCO) are pleased to support HB 560, which would provide coverage of fertility preservation services for Virginia patients with cancer. We encourage the subcommittee to vote the bill forward to the full committee.

VAHO is a professional organization whose mission is to help foster the highest quality of cancer care in the state of Virginia. VAHO members are a community of oncologists, nurse practitioners, physician assistants and other allied health professionals deeply involved in care of our cancer patients. ASCO is a national organization representing physicians who care for people with cancer. With nearly 50,000 members, our core mission is to ensure that cancer patients have meaningful access to high quality, equitable cancer care.

VAHO and ASCO believe that as part of education and informed consent before cancer therapy, health care providers should address the possibility of infertility with both male and female patients treated during their reproductive years. Providers should also be prepared to discuss fertility preservation options and/or refer all potential patients to appropriate reproductive specialists. As such, VAHO and ASCO advocate for coverage of procedures consistent with ASCO guidelines for a covered patient of reproductive age who has been diagnosed with cancer but has not started cancer treatment (including chemotherapy, biotherapy or radiation therapy treatment) in accordance with [guidelines](#) developed by our affiliate organization, the American Society of Clinical Oncology.

We encourage providers to advise patients regarding potential threats to fertility as early as possible in the treatment process to allow for the widest array of options for fertility preservation. VAHO and ASCO strongly support HB 560 and encourage the subcommittee to pass this bill as a first step to ensure coverage for fertility preservation services for patients with cancer. If you have questions or would like assistance on any issue involving the care of individuals with cancer, please contact Aaron Segel at ASCO at [aaron.segel@asco.org](mailto:aaron.segel@asco.org).

Sincerely,

Richard Ingram, MD  
President  
Virginia Association of Hematology and Oncology

Everett E. Vokes, MD, FASCO  
Chair of the Board  
Association for Clinical Oncology
