

How to shake up a committee that controls whether I live \_die\_or get squashed is my problem. There is a certain sense of being comfortable sitting on a committee with foregone conclusions. I am here to tell you that we, at the intersection of Enon Church Rd and Rte 17 are in danger. True, a berm was cut down giving us at least 3-5 seconds more to see oncoming traffic. Thanks for that. It helped. And thanks for the blinking lights installed yesterday. Strange that an engineer wouldn't realize that there is not enough time for a truck to slow down to avoid catastrophe...the lights are much to close to the intersection to be effective. NOONE goes the speed limit of 55MPH. The only ONLY solution is the speed ticket cameras. EVERYONE will pay attention and slow down. You are all welcome to visit my farm and try your hand at pulling out onto Rte 17. After that,,,try it with my trailer full of alpacas. Rte 17 has turned to a speedway set in a rural setting, It's hard to understand why another human being, understanding this condition, would vote against these cameras. It will free up the police, save injuries and bring in revenue. Why?

PLEASE vote to pass this bill. Mary Forte
